Organisation status	Private
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A population file
Database recruitment is carried out as part of an interventional study	No
Database objective	
Main objective	The objectives are to provide statistical analyses on gender norms across generations in Île-et-Vilaine and in greater Brittany regarding alcohol consumption; to compare generations and understand trends in gender and consumption norms; to address nine research hypotheses on: the adjustment of standardised consumption behaviour among girls; differences in consumption according to parental educational models; regulation-control procedures for consumption; the role of peer groups, the "protective role of girls" in peer groups; the issue of attraction and the cultural content of social events, such as "consumption regulation factors".
Inclusion criteria	<ul style="list-style-type: none"> - Young people aged 16 to 25 in the Rennes region; - Elderly people over 60 years old.
Population type	
Age	Adolescence (13 to 18 years) Adulthood (19 to 24 years) Elderly (65 to 79 years)

Great age (80 years and more)

Population covered	General population
Gender	Male Woman
Geography area	Departmental
French regions covered by the database	Bretagne
Detail of the geography area	Île-et-Vilaine, France.
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2012
Size of the database	
Size of the database (number of individuals)	< 500 individuals
Details of the number of individuals	400: - 200 young people - 200 elderly people.
Data	
Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Paper self-questionnaire
Details of collected declarative data	Sociodemographic characteristics, alcohol consumption, festive practices, education, social norms (family and gender), parent expectations for young people.
Presence of a biobank	No
Health parameters studied	Others
Other (detail)	Alcohol consumption.
Procedures	
Participant monitoring	No

Links to administrative sources	No
Promotion and access	
Promotion	
Access	
Terms of data access (charter for data provision, format of data, availability delay)	To be defined.
