Unit	U 669
Organization	INSERM - Institut National de la Santé et de la Recherche
Collaborations	
Funding	
Funding status	Public
Details	Public.
Governance of the database	
Sponsor(s) or organisation(s) responsible	INSERM - Institut National de la Santé et de la Recherche Médicale
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Random selection from the institution: 2 collèges (first 4 years of secondary school) and 2 lycées (further secondary school education).
Database objective	
Main objective	To study the characteristics and risk factors of school-related injuries (accidents).
Inclusion criteria	Pupils registered in institutions participating in the study.
Population type	

Age	Childhood (6 to 13 years) Adolescence (13 to 18 years)
Population covered	General population
Gender	Male Woman
Geography area	Regional
French regions covered by the database	Alsace Champagne-Ardenne Lorraine
Detail of the geography area	Lorraine
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	1995
Date of last collection (YYYY or MM/YYYY)	1996
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	3,294
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data Administrative data
Clinical data (detail)	Medical registration
Declarative data (detail)	Paper self-questionnaire Face to face interview
Details of collected declarative data	The survey used a self-administered questionnaire that was completed in class at the beginning of the academic year, which included subject characteristics and risk factors. This was followed by a face-to-face questionnaire completed by the school nurses for each accident occurring during

the academic year in the presence of the student involved. The students' anonymity is kept using a specific process. The nurse is aware of the student's name and anonymity number. However, they have no access to data and the research team does not know the name of the student.

Administrative data (detail)	sex, date of birth and family characteristics.
Presence of a biobank	No
Health parameters studied	Health event/morbidity Others
Other (detail)	Personality, family background, substance use and chronic fatigue were self-represented.

Procedures

Data collection method	Questionnaire at the beginning of academic year and subsequent follow-up by the nurses' office for each reported injury.
Participant monitoring	Yes
Details on monitoring of participants	At the infirmary: each injury is reported and documented.
Links to administrative sources	No

Promotion and access

Promotion
