Governance of the database	
Sponsor(s) or organisation(s) responsible	InVS
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A population file
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Trained staff conducted 56 4-hour operations in locations frequented by the Parisian gay community in order to form a sample.
Database objective	
Main objective	To determine the incidence of HIV in the Parisian gay community.
Inclusion criteria	<ul style="list-style-type: none"> - male - adult - gay - having had relations within 12 months preceding the study
Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years)
Population covered	General population
Gender	Male
Geography area	Departmental

Detail of the geography area	Paris (14 commercial, gay-friendly establishments throughout Paris)
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	04/2009
Date of last collection (YYYY or MM/YYYY)	06/2009
Size of the database	
Size of the database (number of individuals)	[500-1000[individuals
Details of the number of individuals	886
Data	
Database activity	Data collection completed
Type of data collected	Declarative data Biological data
Declarative data (detail)	Paper self-questionnaire
Details of collected declarative data	Questionnaire: - demographic information - behavioural characteristics (sexuality)
Biological data (detail)	Blood sample for HIV screening
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health care consumption and services
Care consumption (detail)	Medicines consumption
Procedures	
Data collection method	Data collected at baseline.
Participant monitoring	No
Links to administrative sources	No
Promotion and access
