

- Longitudinal study on the relationship between premature birth and perinatal depression

Head :Dayan Jacques, U1077 Neuropsychologie cognitive et neuroanatomie fonctionnelle de la mémoire humaine
Équipe/activité :- Mémoire et amnésies

Last update : 09/05/2017 | Version : 3 | ID : 7982

General

Identification

Detailed name Longitudinal study on the relationship between premature birth and perinatal depression

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation CNIL

General Aspects

Medical area Gynecology/ obstetrics
Psychology and psychiatry

Health determinants Social and psychosocial factors

Keywords premature child, maternity, pregnancy, risk factor

Scientific investigator(s) (Contact)

Name of the director Dayan

Surname Jacques

Address Boulevard Henri Becquerel 14033 CAEN

Email jacques.dayan@inserm.fr

Unit U1077 Neuropsychologie cognitive et neuroanatomie fonctionnelle de la mémoire humaine
Équipe/activité :- Mémoire et amnésies

Organization Institut national de la santé et de la recherche médicale

Collaborations

Funding

Funding status	Public
Details	CHU, Ministry of Social Affairs
Governance of the database	
Sponsor(s) or organisation(s) responsible	Institut national de la santé et de la recherche médicale - Inserm
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Longitudinal study (except cohorts)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Recruitment during prenatal check-up in the obstetrics and gynaecology department in the CHU in Caen.
Database objective	
Main objective	To determine the risk of premature birth based on the depressive state of the mother.
Inclusion criteria	<ul style="list-style-type: none"> - female - between 18 and 45 years old - between the 20th and 28th week of pregnancy
Population type	
Age	<ul style="list-style-type: none"> Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years)
Population covered	General population
Gender	Woman
Geography area	Local

French regions covered by the database	Normandie
Detail of the geography area	The obstetrics and gynaecology department at the CHU in Caen
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	10/1997
Date of last collection (YYYY or MM/YYYY)	09/1998
Size of the database	
Size of the database (number of individuals)	[500-1000[individuals
Details of the number of individuals	681
Data	
Database activity	Data collection completed
Type of data collected	Declarative data Paraclinical data
Declarative data (detail)	Paper self-questionnaire
Details of collected declarative data	Questionnaire measuring the degree of depression
Paraclinical data (detail)	Individual interview with a psychologist
Presence of a biobank	No
Health parameters studied	Quality of life/health perception
Procedures	
Participant monitoring	Yes
Details on monitoring of participants	At motherhood
Links to administrative sources	No
Promotion and access
