Last update : 09/05/2017 | Version : 1 | ID : 8920

General	
Identification	
Detailed name	Cross-sectional studies on alcohol and young people - IREB
Sign or acronym	IREB surveys
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CNIL
General Aspects	
Medical area	Psychology and psychiatry
Health determinants	Addictions Lifestyle and behavior Social and psychosocial factors
Keywords	volume, risks, attitudes, behaviours, trends, consumption
Scientific investigator(s) (Contact)	
Name of the director	Com-Ruelle
Surname	Laure
Address	10 rue Vauvenargues 75018 Paris
Phone	+33 (0)1 53 93 43 29
Email	comruelle@irdes.fr
Organization	IRDES
Name of the director	Choquet
Surname	Marie

Email	Choquet@cochin.inserm.fr
Unit	U 669
Organization	INSERM
Collaborations	
Funding	
Funding status	Mixed
Details	IREB, IRDES.
Governance of the database	
Sponsor(s) or organisation(s) responsible	Institut de Recherches Scientifiques sur les Boissons (IREB)
Organisation status	Private
Sponsor(s) or organisation(s) responsible	Institut de Recherche et Documentation en Economie de la Santé (IRDES)
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	The survey method employs quotas that involve selecting any sample that resembles the entire population, according to certain criteria. The quota method takes advantage of the fact that there are contextual data for the reference population: age, sex, region, type of habitat (75 young people from each gender and birth year (1983 to 1994) were interviewed in 2007).

Database objective	
Main objective	To provide a snapshot of the attitudes and behaviours of young French people attending or not attending school with regards to alcohol and associated risks. The use of repeated cross-sectional survey methodology also allows for a better understanding of consumption trends over time.
Inclusion criteria	<ul style="list-style-type: none"> <li>- between 13 to 20 years old for the 1996 and 2003 surveys and 13 to 24 years old for the 2007 survey.</li> <li>- young people living in a household, outside an institution, whatever their circumstances (living with parents or not, active or not, etc.).</li> <li>- living in metropolitan France excluding Corsica.</li> </ul>
Population type	
Age	Adolescence (13 to 18 years) Adulthood (19 to 24 years)
Population covered	General population
Gender	Male Woman
Geography area	National
Detail of the geography area	Metropolitan France excluding Corsica.
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	1996
Date of last collection (YYYY or MM/YYYY)	2007
Size of the database	
Size of the database (number of individuals)	[1000-10 000[ individuals
Details of the number of individuals	- 1028 (2001) - 1815 (2007).
Data	

Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Paper self-questionnaire Face to face interview
