Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	General population
Pathology	
Gender	Male Woman

Geography area	Regional
French regions covered by the database	Bourgogne Franche-Comté
Detail of the geography area	Burgundy and Franche-Comté
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2013
Size of the database	
Size of the database (number of individuals)	[1000-10 000[ individuals
Details of the number of individuals	8,604
Data	
Database activity	Current data collection
Type of data collected	Clinical data Declarative data Cost data
Clinical data (detail)	Direct physical measures Medical registration
Declarative data (detail)	Paper self-questionnaire Internet self-questionnaire Face to face interview Phone interview
Details of collected declarative data	Quarterly interviews conducted by a social worker.
Presence of a biobank	No
Health parameters studied	Health care consumption and services Quality of life/health perception Others
Care consumption (detail)	Hospitalization Medical/paramedical consultation Medicines consumption
Procedures	

Data collection method	Data collected by a social worker.
Participant monitoring	Yes
Monitoring procedures	Monitoring by contact with the participant (mail, e-mail, telephone etc.)
Details on monitoring of participants	Monitoring the life trajectory of caregivers during caregiving support relationship over 5 years.
Links to administrative sources	No
