**Main objective** The main aim of this study was to assess the addictive behavior of French students' and identify students having the most at risks practices of BD. The second objective was to analyze physical and mental health, violence and access to health care in all students.

**Inclusion criteria** Students in one of the 33 universities who filled in the whole questionnaire.

## Population type

**Age** Adulthood (25 to 44 years)

**Population covered** General population

**Gender** Male  
Woman

**Geography area** National

**Detail of the geography area** FRANCE

## Data collection

### Dates

**Date of first collection (YYYY or MM/YYYY)** 2013

**Date of last collection (YYYY or MM/YYYY)** 2013

## Size of the database

**Size of the database (number of individuals)** Greater than 20 000 individuals

**Details of the number of individuals** 36.427

## Data

**Database activity** Data collection completed

Type of data collected	Declarative data
Declarative data (detail)	Internet self-questionnaire
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health care consumption and services Quality of life/health perception
Care consumption (detail)	Medical/paramedical consultation Medicines consumption
Quality of life/perceived health (detail)	Mental health was evaluated by MHI-5, a part of the Short-Form 36 questionnaire (SF-36).
<b>Procedures</b>	
Participant monitoring	No
Links to administrative sources	No
<b>Promotion and access</b>	
<b>Promotion</b>	
Link to the document	<a href="http://eurpub.oxfordjournals.org/content/eurpub/25/suppl_3/ckv170.088.full.pdf">http://eurpub.oxfordjournals.org/content/eurpub/25/suppl_3/ckv170.088.full.pdf</a>
<b>Access</b>	
Presence of document that lists variables and coding procedures	Yes
Terms of data access (charter for data provision, format of data, availability delay)	Being defined.
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
