

# EPI3 - Cohort of Patients with Three Common Diseases (Musculoskeletal Pain; Sleep, Anxiety and Depressive Disorders and Upper Respiratory Infections): Study on the Impact of Homoeopathic Treatment

Head :Abenhaim Lucien

Begaud Bernard, U 657 Inserm

Last update : 01/01/2020 | Version : 1 | ID : 73224

## General

### Identification

Detailed name	Cohort of Patients with Three Common Diseases (Musculoskeletal Pain; Sleep, Anxiety and Depressive Disorders and Upper Respiratory Infections): Study on the Impact of Homoeopathic Treatment
---------------	---

Sign or acronym	EPI3
-----------------	------

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CNIL
--	------

### General Aspects

Medical area	General practice Infectious diseases Psychology and psychiatry
--------------	--

Pathology (details)	Musculoskeletal pain; sleep, anxiety and depressive disorders and upper respiratory infection
---------------------	---

Health determinants	Healthcare system and access to health care services Iatrogenic
---------------------	--

Keywords	homoeopathy, treatment, prescription, quality of life
----------	---

### Scientific investigator(s) (Contact)

Name of the director	Abenhaim
----------------------	----------

Surname	Lucien
---------	--------

Email	Abenhaim@la-ser.com
-------	---------------------

Organization	LASER
Name of the director	Begaud
Surname	Bernard
Email	bernard.begaud@pharmaco.u-bordeaux2.fr
Unit	U 657 Inserm
Organization	Bordeaux University
Collaborations	
Funding	
Funding status	Private
Details	Boiron Laboratories
Governance of the database	
Sponsor(s) or organisation(s) responsible	Société LA-SER
Organisation status	Private
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A selection of health care professionals
Database recruitment is is made on the basis of:	Another treatment or procedure
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Three groups respectively covering: ? musculoskeletal pain (MSP); ? mixed-depressive disorder (MADD) ? upper respiratory infections (URI). Physicians were divided into three groups: allopathic physician not regularly prescribing

homoeopathy; homoeopathic physicians; physicians engaging in mixed practice who prescribe homoeopathy several times a week.

## Database objective

Main objective The aim of these three groups was to assess the difference between conventional and homoeopathic treatment.

Inclusion criteria Patients with:  
? musculoskeletal pain (MSP);  
? mixed-depressive disorder (MADD)  
? upper respiratory infections (URI)

## Population type

Age Adulthood (19 to 24 years)  
Adulthood (25 to 44 years)  
Adulthood (45 to 64 years)  
Elderly (65 to 79 years)  
Great age (80 years and more)

Population covered Sick population

Gender Male  
Woman

Geography area National

Detail of the geography area France

## Data collection

### Dates

Date of first collection (YYYY or MM/YYYY) 2006

Date of last collection (YYYY or MM/YYYY) 2010

## Size of the database

Size of the database (number of individuals) [1000-10 000[ individuals

Details of the number of individuals 8,559 patients; 825 physicians

## Data

Database activity	Data collection completed
Type of data collected	Clinical data Declarative data
Clinical data (detail)	Direct physical measures
Declarative data (detail)	Face to face interview
Details of collected declarative data	Clinical progression through suitable assessment scales for each cohort; use of conventional medication and medical care in general; patient's overall quality of life and notion of missed opportunity, i.e. transition to chronic state or induced disease.
Presence of a biobank	No
Health parameters studied	Health care consumption and services Quality of life/health perception
Care consumption (detail)	Medicines consumption
Procedures	
Participant monitoring	Yes
Details on monitoring of participants	Follow-up 1 year after enrolment.
Links to administrative sources	No
