Unit Occupational and Environmental Diseases Center

Organization Angers University Hospital

Name of the director	Sallé
Surname	Agnès
Phone	+33 (0)2 41 35 34 31
Email	EDN@chu-angers.fr
Organization	Angers University Hospital
Name of the director	GAUTHIER
Surname	Aline
Unit	Endocrinology ? Diabetology ? Nutrition
Organization	CHU Angers
Collaborations	
Funding	
Funding status	Public
Details	Angers University Hospital
Governance of the database	
Sponsor(s) or organisation(s) responsible	Angers University Hospital
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is is made on the basis of:	Another treatment or procedure
Database recruitment is carried out as part of an interventional	No

study	
Database objective	
Main objective	To determine if the employment rate increased among patients who underwent bariatric surgery; to assess the impact on postoperative health (postprandial weakness, diarrhoea), as well as patient capacity to adhere to postoperative guidance compared with unemployed, post-surgery patients.
Inclusion criteria	All patients who underwent bariatric surgery at Angers University Hospital.
Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years)
Population covered	Sick population
Gender	Male Woman
Geography area	Local
French regions covered by the database	Pays de la Loire
Detail of the geography area	Angers
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2012
Date of last collection (YYYY or MM/YYYY)	2012
Size of the database	
Size of the database (number of individuals)	[500-1000[individuals
Details of the number of individuals	803
Data	

Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Paper self-questionnaire
Details of collected declarative data	Patient work status one month before surgery and at follow-up (at 6, 12, 24, 36, 48, 60 months or more); difficulties encountered adhering to six small meals a day; managing 30 minutes of daily physical activity; postprandial weakness and diarrhoea at work.
Presence of a biobank	No
Health parameters studied	Health event/morbidity Quality of life/health perception
Procedures	
Data collection method	By medical staff
Participant monitoring	Yes
Monitoring procedures	Monitoring by contact with the referring doctor
Details on monitoring of participants	Follow-up at 6, 12, 24, 36, 48, 60 months or more
Links to administrative sources	Yes
Linked administrative sources (detail)	PCS 2003; Occupations and socio-professional categories
Promotion and access	
Promotion	
Link to the document	http://www.ncbi.nlm.nih.gov/pubmed/25890603
Access	
Terms of data access (charter for data provision, format of data, availability delay)	Contact the scientist in charge.
Access to aggregated data	Access not yet planned
Access to individual data	No access
