

# - Cohort of Patients Recovering from Periprosthetic Fracture or Total Hip Replacement

Head :Ehlinger Matthieu

Last update : 06/23/2016 | Version : 1 | ID : 73196

## General

### Identification

Detailed name Cohort of Patients Recovering from Periprosthetic Fracture or Total Hip Replacement

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation CNIL

### General Aspects

Medical area Physical medicine and rehabilitation  
Traumatology

Pathology (details) Periprosthetic fracture

Health determinants Healthcare system and access to health care services  
Iatrogenic  
Medicine

Keywords periprosthetic fracture; recovery from total hip replacement; total hip replacement; orthopaedic registers

### Scientific investigator(s) (Contact)

Name of the director Ehlinger

Surname Matthieu

Phone + 33 (0)3 88 12 77 19

Email Matthieu.ehlinger@chru-strasbourg.fr

Organization Strasbourg University Hospital

### Collaborations

### Funding

Funding status	Private
Details	French Society of Orthopaedic Surgery and Traumatology
<b>Governance of the database</b>	
Sponsor(s) or organisation(s) responsible	Société française de chirurgie orthopédique et traumatologique
Organisation status	Private
<b>Additional contact</b>	
<b>Main features</b>	
<b>Type of database</b>	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A selection of health care professionals
Database recruitment is carried out as part of an interventional study	No
<b>Database objective</b>	
Main objective	This study aims to clarify: (1) the relative frequency of this recovery; (2) risk factors and type of primary THR; (3) review procedures (4) morbidity and mortality of these surgical interventions.
Inclusion criteria	All patients monitored by a member of the French Society of Orthopaedic Surgery and Traumatology recovering from a periprosthetic fracture; total hip replacement (defined as a change in at least one component of primary total hip replacement). Repeated recovery and recovery from hemiarthroplasty are excluded.
<b>Population type</b>	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)

Population covered	Sick population
Gender	Male Woman
Geography area	National
Detail of the geography area	France
<b>Data collection</b>	
<b>Dates</b>	
Date of first collection (YYYY or MM/YYYY)	2009
Date of last collection (YYYY or MM/YYYY)	2011
<b>Size of the database</b>	
Size of the database (number of individuals)	< 500 individuals
Details of the number of individuals	249
<b>Data</b>	
Database activity	Data collection completed
Type of data collected	Clinical data
Clinical data (detail)	Direct physical measures
Details of collected clinical data	Diagnosis that led to fitting a primary prosthetic device; age; sex and previous surgical procedures on the native hip. Age; approach; prosthesis fitting method; implant type; body mass index (BMI); American Society of Anesthesiologists (ASA) Score; Merle d'Aubigné and Postel Score; Charnley category; Oxford-12 Hip Score and Devane activity score. Details on all intraoperative and postoperative surgical complications and medical complications observed within the first 3 months.
Presence of a biobank	No
Health parameters studied	Health care consumption and services
Care consumption (detail)	Medicines consumption

## Procedures

Participant monitoring	Yes
Details on monitoring of participants	2-year monitoring following recovery from periprosthetic fracture or total hip replacement.
Links to administrative sources	No

## Promotion and access

### Promotion
