

ESCORTE: Clinical Events Following Orthopaedic Surgery with Increased Thrombotic Risk - Cohort of Patients with Hip Fracture: Risk of Venous Thromboembolism

Head :Rosencher Nadia, Anaesthesia and Intensive Care Department
SAMAMA Charles Marc

Last update : 06/23/2016 | Version : 1 | ID : 6885

General	
Identification	
Detailed name	Cohort of Patients with Hip Fracture: Risk of Venous Thromboembolism
Sign or acronym	ESCORTE: Clinical Events Following Orthopaedic Surgery with Increased Thrombotic Risk
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CNIL
General Aspects	
Medical area	Cardiology Geriatrics Hematology Physical medicine and rehabilitation Pneumology
Pathology (details)	Thrombosis
Health determinants	Medicine
Keywords	thromboembolic event; risk factor; orthopaedic surgery
Scientific investigator(s) (Contact)	
Name of the director	Rosencher
Surname	Nadia
Address	27, rue du Faubourg Saint-Jacques, F-75679 Paris cedex 14
Phone	+33 (0)1 58 41 31 05

Email	nadia.rosencher@cch.aphp.fr
Unit	Anaesthesia and Intensive Care Department
Organization	Paris Public Hospitals ? Cochin Hospital
Name of the director	SAMAMA
Surname	Charles Marc
Address	Hôpital Cochin 75014 Paris
Phone	0158415320
Email	marc.samama@aphp.fr
Organization	Paris Public Hospitals ? Cochin Hospital
Collaborations	
Funding	
Funding status	Private
Details	Aventis Laboratories
Governance of the database	
Sponsor(s) or organisation(s) responsible	Paris Public Hospitals ? Cochin Hospital
Organisation status	Public
Presence of scientific or steering committees	Yes
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No

Additional information regarding sample selection.

Consecutive patients who are at least 18 years old and admitted to a public or private French hospital (531 centres) for hip fracture surgery were recruited prospectively during 2 months in 2002 and monitored for 6 months.

Database objective

Main objective To determine the risk of venous thromboembolism in patients with a hip fracture.

Inclusion criteria
? male or female
? adult
? admitted to hospital for hip fracture surgery

Population type

Age
Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population covered Sick population

Gender
Male
Woman

Geography area National

Detail of the geography area France (531 orthopaedic surgery centres)

Data collection

Dates

Date of first collection (YYYY or MM/YYYY) 2002

Size of the database

Size of the database (number of individuals) [1000-10 000[individuals

Details of the number of individuals 7,019

Data

Database activity Data collection completed

Type of data collected Clinical data

Declarative data
Paraclinical data

Clinical data (detail)

Direct physical measures
Medical registration

Details of collected clinical data

Follow-up visit

Declarative data (detail)

Face to face interview

Details of collected declarative data

Information on patient health status following surgery.

Paraclinical data (detail)

? ultrasound ? venography ? ventilation/perfusion scan ? pulmonary angiography ? multislice CT

Presence of a biobank

No

Health parameters studied

Health event/morbidity
Health event/mortality

Procedures

Participant monitoring

Yes

Monitoring procedures

Monitoring by contact with the participant (mail, e-mail, telephone etc.)

Details on monitoring of participants

Follow-up for 6 months and thromboembolic event adjudication committee at 3 months.

Links to administrative sources

Yes

Linked administrative sources (detail)

Mortality in France matched according to age.
