## Main features

### Type of database

Type of database Study databases

Study databases (details) Cohort study

Database recruitment is carried out by an intermediary A selection of health institutions and services

Database recruitment is made on the basis of: Another treatment or procedure

Database recruitment is carried out as part of an interventional study Yes

Details Performed at group level (clusters)

### Database objective

Main objective The 'chez soi d'abord' programme aims to test a new care initiative for homeless people with severe mental health problems by offering direct access to regular and sustainable housing with intensive social and healthcare support.

Inclusion criteria being over 18 years of age, covered by French government health insurance including free state aid, speaking French, possessing a 'higher' level of needs being absolutely homeless or precariously housed. having been hospitalized for mental illness two or more times in any one year over the last five years, or having comorbid alcohol or substance use, or

having been arrested or incarcerated over the last two years  
providing informed consent to participate in the programme.

## Population type

Age  
Adulthood (19 to 24 years)  
Adulthood (25 to 44 years)  
Adulthood (45 to 64 years)  
Elderly (65 to 79 years)

Population covered  
Sick population

Pathology  
F31 - Bipolar affective disorder  
F20 - Schizophrenia

Gender  
Male  
Woman

Geography area  
National

Detail of the geography area  
Lille, Marseilles, Toulouse, Paris

## Data collection

### Dates

Date of first collection (YYYY or MM/YYYY)  
2011

Date of last collection (YYYY or MM/YYYY)  
2016

### Size of the database

Size of the database (number of individuals)  
[500-1000[ individuals

Details of the number of individuals  
703

## Data

Database activity  
Data collection completed

Type of data collected  
Clinical data  
Declarative data  
Cost data  
Utility / preference data

Details of collected clinical data	Global Clinical Impact (GCI); Mini International Neuropsychiatric Interview (MINI)
Declarative data (detail)	Paper self-questionnaire Face to face interview
Details of collected declarative data	Modified Colorado Symptom Index (MCSI); Medical Outcomes Study 36-item Short Form Health Survey (SF-36); Recovery Assessment Scale (RAS); Quality of life (S-QoL 18) ; Medication Adherence Rating Scale (MARS)
