

PHASTE - Cohort of Patients in General Medicine: High Blood Pressure Study

Head :Mourad Jean-Jacques

Last update : 09/05/2017 | Version : 1 | ID : 73127

General	
Identification	
Detailed name	Cohort of Patients in General Medicine: High Blood Pressure Study
Sign or acronym	PHASTE
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CNIL
General Aspects	
Medical area	Cardiology General practice
Health determinants	Healthcare system and access to health care services Iatrogenic Medicine
Keywords	cardiovascular risk, hypertension, blood pressure, treatment, general practitioners
Scientific investigator(s) (Contact)	
Name of the director	Mourad
Surname	Jean-Jacques
Email	jean-jacques.mourad@avc.aphp.fr
Organization	AP-HP
Collaborations	
Participation in projects, networks and consortia	Yes
Funding	

Funding status	Mixed
Details	Therval médical, CFLHTA
Governance of the database	
Sponsor(s) or organisation(s) responsible	Comité Français de Lutte contre l'HyperTension Artérielle
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A selection of health care professionals
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Subjects are enrolled by general practitioners. Patients are divided into five age groups, according whether antihypertensive therapy is in progress.
Database objective	
Main objective	The aim is to extensively map hypertensive patients monitored by general practitioners, focusing on level of pulse pressure.
Inclusion criteria	Subjects with uncontrolled hypertension (SBP >140 mmHg and/or DBP >90 mmHg), either treated or not treated.
Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	Sick population

Gender	Male Woman
Geography area	National
Detail of the geography area	France
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	1999
Date of last collection (YYYY or MM/YYYY)	1999
Size of the database	
Size of the database (number of individuals)	[10 000-20 000[individuals
Details of the number of individuals	17,716
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Biological data
Clinical data (detail)	Direct physical measures
Details of collected clinical data	Sex; age; family (first-degree relatives); history of premature cardiovascular events (for men, aged <55 years; for women, aged <60 years); personal history of diabetes mellitus and/or dyslipidaemia; smoking habits; previous diseases and use of medications, including antihypertensive drugs.
Biological data (detail)	Blood pressure; arterial pressure
Presence of a biobank	No
Health parameters studied	Health care consumption and services
Care consumption (detail)	Medicines consumption
Procedures	
Data collection method	Questionnaire completed by general practitioners.

Participant monitoring	Yes
Links to administrative sources	No
Promotion and access	
Promotion	
Link to the document	http://hyper.ahajournals.org/content/38/4/958.long
Access	
Terms of data access (charter for data provision, format of data, availability delay)	Contact the scientist in charge.
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
