

MAThYS - Case-Control Study on Bipolar Patients: Validation of the MAThYS (Multidimensional Assessment of Thymic States) Scale

Head : Falissard Bruno, Inserm U1018 ? Centre for Research in Epidemiology and Population Health ? Team:
Gender, Sexual and Reproductive Health
Henry Chantal, Department of Psychiatry

Last update : 07/03/2016 | Version : 1 | ID : 4672

General	
Identification	
Detailed name	Case-Control Study on Bipolar Patients: Validation of the MAThYS (Multidimensional Assessment of Thymic States) Scale
Sign or acronym	MAThYS
General Aspects	
Medical area	Psychology and psychiatry
Pathology (details)	Bipolar disorders
Health determinants	Healthcare system and access to health care services
Keywords	multidimensional approach, scale, bipolar disorder, MAThYS (Multidimensional Assessment of Thymic States), emotions, assessment, tool
Scientific investigator(s) (Contact)	
Name of the director	Falissard
Surname	Bruno
Address	CESP
Phone	+33 (0)1 58 41 58 50
Email	falissard_b@wanadoo.fr
Unit	Inserm U1018 ? Centre for Research in Epidemiology and Population Health ? Team: Gender, Sexual and Reproductive Health
Organization	Inserm

Name of the director	Henry
Surname	Chantal
Email	chantal.henry@inserm.fr
Unit	Department of Psychiatry
Organization	Paris Public Hospitals (AP-HP), Henri Mondor-Albert Chenevier Hospitals
Collaborations	
Funding	
Funding status	Public
Details	Public
Governance of the database	
Sponsor(s) or organisation(s) responsible	INSERM - National Institute of Health and Medical Research
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Case control study
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Additional information regarding sample selection.	The first group included control subjects, with no bipolar disorder, recruited by means of an advertisement (e.g. in shopping areas and sports associations). Euthymic bipolar outpatients were recruited from consultations. Bipolar patients presenting with a depressive, manic, hypomanic or mixed episodes were recruited from consecutive admissions as inpatients in general psychiatry units and as outpatients attending a consultation for a bipolar disorder (Charles Perrens Hospital, Bordeaux, France).
Database objective	

Main objective	To evaluate and validate the MATHyS (Multidimensional Assessment of Thymic States) Scale.
Inclusion criteria	Bipolar patients in various states: euthymic, manic or depressed.
Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years)
Population covered	Sick population
Gender	Male Woman
Geography area	National
Detail of the geography area	France (Charles Perrens Hospital, Bordeaux, France and associations).
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2007
Date of last collection (YYYY or MM/YYYY)	2011
Size of the database	
Size of the database (number of individuals)	< 500 individuals
Details of the number of individuals	196
Data	
Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Paper self-questionnaire
Details of collected declarative data	Mood during the preceding week.

Presence of a biobank	No
Health parameters studied	Health care consumption and services Quality of life/health perception
Care consumption (detail)	Medical/paramedical consultation
Procedures	
Data collection method	This is a self-administered questionnaire.
Participant monitoring	No
Links to administrative sources	No
Promotion and access	
Promotion
