

RPSM 78 - Cross-sectional study of treatment of patients with frequent mental disorders

Head :Falissard Bruno , Inserm U1018 - Centre de Recherche en Épidémiologie et Santé des Populations
Équipe: Genre, Santé sexuelle et Reproductive
Younes Nadia

Last update : 10/19/2017 | Version : 1 | ID : 4140

General

Identification

Detailed name	Cross-sectional study of treatment of patients with frequent mental disorders
Sign or acronym	RPSM 78

General Aspects

Medical area	Psychology and psychiatry
Keywords	mental disorder treatment, network

Scientific investigator(s) (Contact)

Name of the director	Falissard
Surname	Bruno
Address	CESP
Phone	+ 33 (0)1 58 41 58 50
Email	falissard_b@wanadoo.fr
Unit	Inserm U1018 - Centre de Recherche en Épidémiologie et Santé des Populations Équipe: Genre, Santé sexuelle et Reproductive
Organization	INSTITUT NATIONAL DE LA SANTE ET DE LA RECHERCHE MEDICALE -

Name of the director	Younes
Surname	Nadia
Email	nadiayounes@alicemail.fr
Organization	Centre Hospitalier de Versailles

Collaborations	
Funding	
Funding status	Public
Details	DRDR (Dotation Régionale de Développement des Réseaux) : approval in 2009 for 3 years.
Governance of the database	
Sponsor(s) or organisation(s) responsible	Direction départementale des Affaires sanitaires et sociales (DDAS, Caisse primaire d'assurance maladie (CPAM)
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health care professionals A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Physicians in the half-department of Yvelines Sud (via the DDASS for independent physicians and via health-care institutions for public physicians). 652 physicians (492 general practitioners, 82 independent psychiatrists, 78 public institution psychiatrists)
Database objective	
Main objective	To evaluate the impact, the suitability and the efficacy of the RPSM 78 network Purpose of the network: to improve the provision of mental health care by improving the coordination between the actors involved in mental health across the country.
Inclusion criteria	Open network based on the voluntary participation of all of the "professionals concerned with mental

health" in the geographical area of Yvelines Sud (a half-department corresponding to health sector No. 9, which covers 650,000 residents)

Population type

Age	Adulthood (25 to 44 years) Adulthood (45 to 64 years)
-----	--

Population covered	General population
--------------------	--------------------

Pathology

Gender	Male Woman
--------	---------------

Geography area	Departmental
----------------	--------------

French regions covered by the database	Île-de-France
--	---------------

Detail of the geography area	Yvelines-Sud
------------------------------	--------------

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)	2000
--	------

Date of last collection (YYYY or MM/YYYY)	2000
---	------

Size of the database

Size of the database (number of individuals)	[1000-10 000[individuals
--	---------------------------

Details of the number of individuals	3237
--------------------------------------	------

Data

Database activity	Current data collection
-------------------	-------------------------

Type of data collected	Declarative data
------------------------	------------------

Declarative data (detail)	Paper self-questionnaire
---------------------------	--------------------------

Details of collected declarative data	age, sex, profession, Number of consultations, pathology, description of the pathology, type of management and treatment
---------------------------------------	--

Presence of a biobank	No
Health parameters studied	Health event/morbidity Health care consumption and services
Care consumption (detail)	Medical/paramedical consultation
Procedures	
Data collection method	Patients are enrolled by physicians who have been asked to enrol their general population patients, 15 years of age or older during the week established for the study (week number 12). The questionnaire requires approximately 30 minutes to be completed. It includes a "physician" section and a "patient" section, both to be completed by the practitioner.
Participant monitoring	No
Followed pathology	
Links to administrative sources	No
Promotion and access	
Promotion	
Link to the document	http://www.ncbi.nlm.nih.gov/pubmed/16212666
Access	
Terms of data access (charter for data provision, format of data, availability delay)	Contact the scientist in charge
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
