Main features

Type of database

Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)

Database recruitment is carried out by an intermediary	A population file
--	-------------------

Database recruitment is carried out as part of an interventional study	No
--	----

Database objective

Main objective	To study the relationship between social inequalities and the use of psychotropic agents
----------------	--

Inclusion criteria	Youths 15 years of age and older living in Lorraine, selected at random
--------------------	---

Population type

Age	Adulthood (19 to 24 years)
-----	----------------------------

Population covered	General population
Pathology	
Gender	Male Woman
Geography area	Regional
French regions covered by the database	Alsace Champagne-Ardenne Lorraine
Detail of the geography area	Lorraine
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2007
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	1257
Data	
Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Paper self-questionnaire
Details of collected declarative data	Sex, year of birth, height, weight, level of education, occupation, tobacco consumption, alcohol consumption, income, health condition, diseases, handicaps, personality traits, family support, frequency of consumption of psychotropic medicines for fatigue, anxiety or insomnia.
Presence of a biobank	No
Health parameters studied	Health event/morbidity
Procedures	
Data collection method	Standardised self-questionnaires to be completed at home (sex, age, weight, height, educational level,

self-perception, consumption of tobacco, alcohol, etc.)

Participant monitoring Yes

Monitoring procedures Monitoring by contact with the participant (mail, e-mail, telephone etc.)

Details on monitoring of participants 3 standardised questionnaires at one-month intervals
