

BACAP - Anatomical-Clinical Pancreatic Adenocarcinoma Database

Head :Bournet Barbara, Gastro-entérologie et nutrition
Canivet Cindy

Last update : 11/09/2018 | Version : 1 | ID : 38993

General

Identification

Detailed name	Anatomical-Clinical Pancreatic Adenocarcinoma Database
Sign or acronym	BACAP
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CNIL: 913462; Collection declaration No.: DC-2013-1974

General Aspects

Medical area	Cancer research Gastroenterology et hepatology
Pathology (details)	Adenocarcinoma of pancreas
Health determinants	Genetic Lifestyle and behavior Medicine Nutrition Occupation
Keywords	Clinical data, biological specimens, pancreatic carcinogenesis, therapeutic target, cachexia, biomarker, proteomics signature, genomic DNA, microparticles, diagnosis, screening, microRNA

Scientific investigator(s) (Contact)

Name of the director	Bournet
Surname	Barbara
Address	Gastroenterology and Nutrition Department Hôpital Rangueil 1 avenue Jean Poulhes 31059 Toulouse cedex 9

Phone	(+33) 5 61 32 27 61
Email	bournet.b@chu-toulouse.fr
Unit	Gastro-entérologie et nutrition
Organization	CHU Toulouse

Name of the director	Canivet
Surname	Cindy
Phone	+33 (0)5 61 32 20 48
Email	canivet.c@chu-toulouse.fr
Organization	CHU Toulouse

Collaborations

Participation in projects, networks and consortia	Yes
---	-----

Details	BACAP consists of a network of clinicians (physicians and surgeons), anatomical pathologists, epidemiologists, and researchers
---------	--

Funding

Funding status	Public
----------------	--------

Details	French National Cancer Institute (INCa)
---------	---

Governance of the database

Sponsor(s) or organisation(s) responsible	CHU Toulouse
---	--------------

Organisation status	Public
---------------------	--------

Presence of scientific or steering committees	Yes
---	-----

Additional contact

Main features

Type of database

Type of database	Study databases
------------------	-----------------

Study databases (details)	Longitudinal study (except cohorts)
---------------------------	-------------------------------------

Database recruitment is carried out by an intermediary	A selection of health institutions and services
--	---

Database recruitment is carried out as part of an interventional study	No
--	----

Additional information regarding sample selection.	During diagnosis of the disease
--	---------------------------------

Database objective

Main objective	<p>The purpose of this project is to compile clinical data and data on biological specimens from patients with a pancreatic adenocarcinoma in order to make it available to the scientific community.</p> <p>The purpose of BACAP is to support the following research projects:</p> <ul style="list-style-type: none">- understanding the development of pancreatic carcinogenesis,- the early diagnosis and screening of pancreatic cancer by identifying biomarkers of precancerous lesions (proteomics signature, microRNA, genomic dNA, microparticles) and associated thrombosis risk,- the development of new in vitro tools for diagnosing pancreatic cancer,- the clinical and biological evaluation of the development of cachexia in patients with pancreatic cancer,- the determination of factors responsible for spreading cancerous cells, especially inflammation markers,- the identification of biomarkers that indicate sensitivity or resistance to chemotherapy in pancreatic cancer,- the development of new therapeutic targets
----------------	--

Inclusion criteria	Patients with cytologically and/or histologically proven pancreatic adenocarcinoma
--------------------	--

Population type

Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
-----	---

Population covered	Sick population
--------------------	-----------------

Pathology	C00-C75 - Malignant neoplasms, stated or
-----------	--

presumed to be primary, of specified sites, except of lymphoid, haematopoietic and related tissue

Gender	Male Woman
Geography area	National
Detail of the geography area	15 centres : Toulouse (CHU de Toulouse), Montpellier (Institut régional du Cancer de Montpellier et CHU de Montpellier), Marseille (Assistance Publique des Hôpitaux de Marseille - hôpital Nord et hopital La Timone), Nice (CHU de Nice - hôpital l'Archet), Lyon (hôpital privé Jean Mermoz et Centre Léon Bérard), Villejuif (Institut Gustave Roussy), Paris (Assistance Publique des Hôpitaux de Paris - hôpital Saint-Louis), Paris (Clinique du Trocadero), Lille (CHRU de Lille), Bordeaux (CHU de Bordeaux), Pau (CH de Pau)

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)	2014
Date of last collection (YYYY or MM/YYYY)	undetermined

Size of the database

Size of the database (number of individuals) [1000-10 000] individuals

Details of the number of individuals 1250

Data

Database activity Current data collection

Type of data collected
Clinical data
Declarative data
Paraclinical data
Biological data

Clinical data (detail) Direct physical measures

Details of collected clinical data
Imaging, biological assessment, clinical examination, treatments and side effects, weight progression, height, WHO performance index, medical comorbidities, history of other cancers, the date of

first symptoms/description, diagnosis, tumour

Details of collected declarative data

Age, sex, level of education, employment, alcohol + tobacco consumption, risks of venous thromboembolism, cancer in the family

Paraclinical data (detail)

Biopsy, Endoscopic ultrasound, Tomodensitometry

Biological data (detail)

CBC, liver panel, glycaemia, tumoural markers

Presence of a biobank

Yes

Contents of biobank

Whole blood
Serum
Plasma
Fluids (saliva, urine, amniotic fluid, ?)
Tissues
DNA
DNAc/RNAc

Details of biobank content

blood, serum, plasma, saliva, DNA-RNA of tumoural cells

Health parameters studied

Health event/mortality

Procedures

Data collection method

During patient visits to the corresponding hospital. Collection by clinicians (gastroenterologists, oncologists, surgeons)

Quality procedure(s) used

Clinsight software, the database is managed by the ICM data handling centre

Participant monitoring

Yes

Monitoring procedures

Monitoring by contact with the referring doctor

Details on monitoring of participants

at each clinical check-up and instance of patient imaging

Links to administrative sources

No

Promotion and access

Promotion

Link to the document

[Papier BACAP.pdf](#)

Description

BACAP presentation publication

Access

Presence of document that lists variables and coding procedures	Yes
Terms of data access (charter for data provision, format of data, availability delay)	The data and the biological specimens are accessible upon request. The request form is accessible on the database website. Each request will be examined by the database's scientific committee.
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
