Unit Cardiovascular rehabilitation unit

Organization CH DE Basse-Terre

Collaborations	
Funding	
Funding status	Public
Details	CH de Basse-Terre
Governance of the database	
Sponsor(s) or organisation(s) responsible	CH de Basse-Terre
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	An administrative base or a register
Base or register (detail)	List of those entitled to unemployment, minimum integration income (RMI) social services
Database recruitment is is made on the basis of:	Another treatment or procedure
Database recruitment is carried out as part of an interventional study	No
Database objective	
Main objective	The purpose of this study is to describe the prevalence and treatment of arterial hypertension in a population that is precarious but has good social coverage and good access to the health care system
Inclusion criteria	The study's inclusion criteria for defining precarity were: receiving the minimum integration income (RMI) and/or unemployment and/or living exclusively on social and family services

Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years)
Population covered	General population
Pathology	
Gender	Male Woman
Geography area	Local
French regions covered by the database	Guadeloupe
Detail of the geography area	Guadeloupe
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2001
Date of last collection (YYYY or MM/YYYY)	2003
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	2420
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data
Clinical data (detail)	Medical registration
Details of collected clinical data	Blood pressure, BMI
Details of collected declarative data	Socioeconomic data, precarity index, cardiovascular risk factors and health-care consumption

Presence of a biobank	No
Health parameters studied	Health event/morbidity
Procedures	
Data collection method	Via surveyors
Participant monitoring	Yes
Details on monitoring of participants	Blood pressure check-up visit one month later
Links to administrative sources	Yes
Promotion and access
