### Governance of the database

Sponsor(s) or organisation(s) responsible ISPED

Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A population file
Database recruitment is carried out as part of an interventional study	Yes
Details	Performed at individual level
Database objective	
Main objective	<p>The purpose is to make an inventory of the habitual practices of nursery school children in terms of snacks at school, including birthday treats, in Aquitaine. This inventory allows for the acquisition of information on the perceptions, practices, changes and expectations of the students, as well as guidance of the methods of intervention intended to improve these practices.</p> <p>The renewal of this survey after intervention allows for the evaluation of its efficacy and the change in students' perceptions.</p>
Inclusion criteria	Nursery schools of the Bordeaux school district completing the questionnaire
Population type	
Age	Early childhood (2 to 5 years)
Population covered	General population
Pathology	
Gender	Male Woman
Geography area	Regional

French regions covered by the database	Aquitaine Limousin Poitou-Charentes
Detail of the geography area	Aquitaine
<b>Data collection</b>	
<b>Dates</b>	
Date of first collection (YYYY or MM/YYYY)	2005
Date of last collection (YYYY or MM/YYYY)	2008
<b>Size of the database</b>	
Size of the database (number of individuals)	[1000-10 000[ individuals
Details of the number of individuals	1315 (2005 : 387 ; 2008: 928)
<b>Data</b>	
Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Paper self-questionnaire
Details of collected declarative data	Student's personal opinion of snacking practices. Snacking practices. Birthday treat practice, Changes and prospects for change in practices. Knowledge of the NPS programme. Need in terms of information and training
Presence of a biobank	No
Health parameters studied	Others
<b>Procedures</b>	
Data collection method	Questionnaire to be filled out
Quality procedure(s) used	Epi info. Stata
Participant monitoring	No
Followed pathology	
Links to administrative sources	No
