Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	An administrative base or a register
Base or register (detail)	Recipients of the minimum integration income (RMI) at a mainland France CAF on 31 December 1996
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Sample of 10,000 individuals, representing 882,047 recipients of the minimum integration income (RMI) enrolled in mainland France CAFs on 31 December 1996. The first questioning, streamlined, allowed for the identification of 1,850 individuals who had stopped receiving the minimum integration income (RMI) between December 1996 and September 1997. This first set was completed by a sample of 2,350 recipients, selected from those still receiving government benefits in September. The 4,200

individuals were questioned for a first time in January 1998 and a second time in September 1998.

Database objective

Main objective The purpose of this methodological study is to specify the family configuration actually experienced by recipients of the minimum integration income (RMI).

Inclusion criteria All of the individuals receiving the minimum integration income (RMI) from the metropolitan France on 31 December 1996, except for old farmers enrolled in the Mutualité sociale agricole

Population type

Age Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population covered General population

Pathology

Gender Male
Woman

Geography area National

Detail of the geography area France

Data collection

Dates

Date of first collection (YYYY or MM/YYYY) 1996

Date of last collection (YYYY or MM/YYYY) 1998

Size of the database

Size of the database (number of individuals) [1000-10 000] individuals

Details of the number of individuals 7953

Data

Database activity Data collection completed

Type of data collected Declarative data

Details of collected declarative data Lodging, occupational integration, living conditions, family configuration

Presence of a biobank No

Health parameters studied Quality of life/health perception

Procedures

Data collection method Computer-assisted personal interviewing (CAPI)

Participant monitoring No

Followed pathology

Access

Terms of data access (charter for data provision, format of data, availability delay)

Available formats: The data are available in SAS, SPSS and STATA formats. Confidentiality statement: To obtain the data, you must agree not to transfer the data, in any way, to a third party. Restrictions for use: The data may only be used for research purposes. Any other use, commercial or otherwise, is strictly prohibited. Reference requirement: The source of the data received must appear in the publications supported by these data (including footnotes, bibliographic references, table legends). Submission requirement: In order to provide the producing organisations with essential information regarding the use of the archived resources, the data users are required to send the ADISP-CMH, if possible in electronic format, an abstract or a reprint of their publication(s), indicating which studies were used in an accompanying letter. Conditions of access: Different access procedures

according to the requesting party's institutional affiliation and status. In all cases, the approval of the request at the end of instruction leads to the signature of an individual agreement. Liability disclaimer: The producer and sharer of the data are not responsible for interpretations or deductions made using the data. Contact: ADISP-CMH = diffusion.adisp@ens.fr
