Population type	
Age	Adolescence (13 to 18 years) Adulthood (19 to 24 years)
Population covered	General population
Pathology	
Gender	Male Woman
Geography area	National
Detail of the geography area	France
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2005
Date of last collection (YYYY or MM/YYYY)	2014
Size of the database	
Size of the database (number of individuals)	Greater than 20 000 individuals
Details of the number of individuals	20 400 (2011)
Data	
Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Paper self-questionnaire Phone interview
Details of collected declarative	8 themes: their living conditions, - their health

data	condition and their utilisation of care, - their mental health, - their consumption of tobacco, alcohol, cannabis and other products, - their emotional and sexual life, - their dietary habits, - their pace of life, - their leisure
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health care consumption and services Quality of life/health perception
Care consumption (detail)	Medical/paramedical consultation
Procedures	
Participant monitoring	No
Followed pathology	
Links to administrative sources	No
Promotion and access	
Promotion	
Link to the document	http://www.lmde.com/securite-sociale-et-sante-des-etudiants/lexpertise-sante-de-la-lmde.html
Access	
Terms of data access (charter for data provision, format of data, availability delay)	To be defined
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
