

PRESAJE - Exposed/unexposed study of youths monitored in 5 local missions in France

Head :Chauvin Pierre, UMRS 707, equipe ds3 - UPMC
Lesieur Sophie , UMRS 707, equipe ds3 - UPMC

Last update : 10/19/2017 | Version : 1 | ID : 73101

General	
Identification	
Detailed name	Exposed/unexposed study of youths monitored in 5 local missions in France
Sign or acronym	PRESAJE
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CNIL n°1527880 5 (August 2011)
General Aspects	
Medical area	General practice
Health determinants	Healthcare system and access to health care services Lifestyle and behavior Occupation Social and psychosocial factors
Keywords	Youth, economy, health-related, health, behaviour, access to care, prospective cohort
Scientific investigator(s) (Contact)	
Name of the director	Chauvin
Surname	Pierre
Phone	+33 (0)1 44 73 84 60 +33 (0)1 44 73 84 50
Email	chauvin@u707.jussieu.fr
Unit	UMRS 707, equipe ds3 - UPMC
Organization	Inserm
Name of the director	Lesieur

Surname	Sophie
Phone	+33 (0)1 44 73 84 65
Email	sophie.lesieur@u707.jussieu.fr
Unit	UMRS 707, equipe ds3 - UPMC
Organization	Inserm
Collaborations	
Participation in projects, networks and consortia	Yes
Details	partnership between the Maison de l'Emploi et de la Formation de Sénart, the Centre de Recherche en Economie et Statistiques (CREST) of Insee and ERES
Funding	
Funding status	Public
Details	Fonds d'Expérimentation pour la Jeunesse as part of call for projects No. 2 launched in October 2009 by the Ministry responsible for youths
Governance of the database	
Sponsor(s) or organisation(s) responsible	CREST - GRECSTA
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	An administrative base or a register
Base or register (detail)	Record of 5 local missions
Database recruitment is carried out as part of an interventional	Yes

study

Details

Performed at group level (clusters)

Additional information regarding sample selection.

3 groups:

- Group 1 having a consultation with the physician from the local Mission. It consists of an investigation of the youths' health condition, their relationships with care structures, their knowledge and attitudes regarding health prevention. It is also intended to determine the nature of the youths' needs, to direct them toward the suitable care structures and to provide them with advice regarding health education. The youths and the physician subsequently decide on the frequency of their meetings. The youths may also begin psychological monitoring if they would like. Lastly, the youths' rights to compensation are optimised, i.e. a person from the local Mission performs the necessary procedures with the competent institutional structures in order to allow them to receive the largest possible welfare benefits.
- Group 2 only receives optimisation of rights to compensation.
- Group 3 is the control group. They do not receive the medical consultation or optimisation of their rights to compensation, and are monitored normally by their advisor

Database objective

Main objective

The objectives of this project, titled "Presaje", were to find out the health conditions and attitudes toward health of youths monitored in local Missions and to understand their health care use (or non-use) behaviours in order to improve their access to care and to evaluate any impact on their social integration and job placement.

Inclusion criteria

Youths from 16-25 years of age accommodated in one of 5 local missions (Sénart, Reims, Poitou, Toulouse and La Dhuys).

Population type

Age

Adolescence (13 to 18 years)
Adulthood (19 to 24 years)

Population covered

General population

Pathology

Gender

Male

	Woman
Geography area	National
Detail of the geography area	Sénart, Reims, Poitou, Toulouse and La Dhuis
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2011
Date of last collection (YYYY or MM/YYYY)	2013
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	1453
Data	
Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Face to face interview
Details of collected declarative data	Living conditions, social welfare, defining events, training, family environment, geographic origin, health
Presence of a biobank	No
Health parameters studied	Health care consumption and services Quality of life/health perception
Care consumption (detail)	Medical/paramedical consultation
Procedures	
Participant monitoring	Yes
Details on monitoring of participants	Follow-up for one year following the first questionnaire
Links to administrative sources	No
