Main features

Type of database

Type of database Study databases

Study databases (details) Repeated cross-sectional studies (except case control studies)

Database recruitment is made on the basis of: Another treatment or procedure

Database recruitment is carried out as part of an interventional study No

Additional information regarding sample selection. The individuals interviewed were selected following the quota method calculated based on the published results of the INSEE Employment surveys, according to sex, age, the profession of the reference person, the highest level of education achieved and active/inactive status, after stratification by region and cluster size.

Database objective

Main objective To study:
* the perception of problems related to health, to the handicap, to dependence, family, retirement,

social welfare, precarity and exclusion;
* the ways of understanding issues related to these problems;
* opinions of the systems that currently exist, in terms of organisation, financing and redistribution;
* the values underlying all of these representations;
* the hierarchy of expectations and preoccupations for the future.

Individuals 18 years of age or older who reside in metropolitan France

Population type

Age

Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population covered

General population

Pathology

Gender

Male
Woman

Geography area

National

Detail of the geography area

Metropolitan France

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)

2000

Size of the database

Size of the database (number of individuals)

[1000-10 000[individuals

Details of the number of individuals

3 000 each year

Data

Database activity

Current data collection

Type of data collected

Terms of data access (charter for data provision, format of data, availability delay)

? If you belong to a research organisation, the databases may be accessed under certain conditions on the Réseau Quételet website (<http://www.reseau-quetelet.cnrs.fr/...>). ? Furthermore, the databases of all of the data available at this time since the year 2000 may be accessed by any research or teaching organisation by sending a request to Drees.

This access is granted by means of a CD-ROM containing for each of the available areas of the Poll:

- the survey questionnaire
- the database in "fixed-length text" format
- the design for registration or column layout
- the methodology note (unavailable for the survey)

from the year 2000).

Access to aggregated data

Free access

Access to individual data

Access on specific project only
