Population type

Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	General population
Pathology	
Gender	Male Woman
Geography area	National
Detail of the geography area	Urban areas with more than 20,000 inhabitants in metropolitan France

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)	2001
Date of last collection (YYYY or MM/YYYY)	2012

Size of the database

Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	4 000 (2001) ; 8 700 (2012)

Data

Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Paper self-questionnaire Face to face interview
Details of collected declarative data	- Sociodemographic characteristics; - Frequentation of services and the situation with regard to housing; - Living conditions (according to where the person sleeps: dormitory or room in collective accommodation, lodging, hotel, street or other place not intended as a dwelling); - Residential stability and precariousness; Housing mobility; - Housing search; - Income, financial difficulties; - The situation with regard to the labour market; - Training and work experience; - Participation in social life; - Health and social security; - Family and childhood; - Life events; - The use of services, the use of assistance.
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health care consumption and services Quality of life/health perception
Care consumption (detail)	Hospitalization Medical/paramedical consultation Medicines consumption
Quality of life/perceived health (detail)	perception of state of health

Procedures

Data collection method	declarative
Participant monitoring	No
Followed pathology	
Links to administrative sources	No

Promotion and access

Promotion
