Organization	INPES
Collaborations	
Participation in projects, networks and consortia	Yes
Details	In partnership with the Institut de la statistique de la Polynésie française (ISPF), The Ministry of Education, Higher Education and Research of French Polynesia
Funding	
Funding status	Public
Details	The French Polynesia Health Department
Governance of the database	
Sponsor(s) or organisation(s) responsible	INPES
Organisation status	Public
Sponsor(s) or organisation(s) responsible	The French Polynesia Health Department
Organisation status	Public
Presence of scientific or steering committees	Yes
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No

Additional information regarding sample selection.

The selected sampling is a two-tier random sampling per cluster, the first selecting facilities with the probability of a draw proportional to the size of the facility and the second of whole classes (clusters) among these facilities.

Database objective

Main objective

This is a school-based survey that provides an epidemiological and sociological assessment of the situation. A number of questions about their health, their living conditions, their everyday concerns, their level of well-being and their interests allow us to profile Polynesian adolescents.

Inclusion criteria

Students from year 7 to the final year, Centres for Young Adolescents (CJA), Centre for Education for Appropriate Technologies for Development (CETAD), Development Education Centres (CED) and Family and Rural Homes (MFR) included (in French Polynesia).

Population type

Age

Adolescence (13 to 18 years)

Population covered

General population

Pathology

Gender

Male
Woman

Geography area

Regional

Detail of the geography area

French Polynesia

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)

2009

Date of last collection (YYYY or MM/YYYY)

2009

Size of the database

Size of the database (number of individuals)

[1000-10 000] individuals

Details of the number of individuals 4850

Data

Database activity Data collection completed

Type of data collected Declarative data

Declarative data (detail) Paper self-questionnaire

Details of collected declarative data Daily life, social context and psychological profile of young people in school (demographic characteristics, school life, everyday life outside of school, desire for information in health education, depressive intensity, sleep). Analysis of psychoactive consumption (tobacco, alcohol, paka [cannabis], other drugs)

Presence of a biobank No

Health parameters studied Health event/morbidity
Quality of life/health perception

Procedures

Participant monitoring No

Followed pathology

Links to administrative sources Yes

Linked administrative sources (detail) Secondary education database (DES), from the 2008 back to school survey
