Inclusion criteria	Pupils of year 11 and 7: sampling at random using pupils' birthdays with the possibility for schools to survey all pupils

Population type	
Age	Childhood (6 to 13 years) Adolescence (13 to 18 years)
Population covered	General population
Pathology	
Gender	Male Woman
Geography area	Regional
French regions covered by the database	Nord - Pas-de-Calais Picardie
Detail of the geography area	Picardie
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2006
Date of last collection (YYYY or MM/YYYY)	2015
Size of the database	
Size of the database (number of individuals)	Greater than 20 000 individuals
Details of the number of individuals	24000
Data	
Database activity	Current data collection
Type of data collected	Declarative data Paraclinical data
Declarative data (detail)	Paper self-questionnaire Internet self-questionnaire Face to face interview
Details of collected declarative data	sociodemographic data, health practices, addictions, eating behaviour, schooling, vaccinations, sexuality and contraception, physical activity, leisure and extracurricular activities

Paraclinical data (detail)	measurement of height, weight and waist circumference, control of oral health, vaccinations, pathologies
Presence of a biobank	No
Health parameters studied	Health event/morbidity Others
Procedures	
Data collection method	self-questionnaire and nurse's assessment
Participant monitoring	No
Followed pathology	
Links to administrative sources	No
Promotion and access	
Promotion
