## Database objective

Main objective	<p>The objectives of the ENFAMS survey:</p> <ul style="list-style-type: none"> <li>- estimate the size of the population of families without housing in Île-de-France and describe their sociodemographic characteristics;</li> <li>- characterise the living conditions, history and state of health of these families; 2</li> <li>- describe the state of health of mothers and children on three main lines: use of health care, mental health, nutritional health, perinatal health;</li> <li>- comparing the prevalence and results obtained with other studies carried out among homeless populations, precarious populations or the general population;</li> <li>- describe the impact of homelessness on the daily and social lives of parents and children, focusing in particular on the matter of schooling.</li> </ul>
----------------	--

Inclusion criteria	<p>Families without housing (housed in emergency accommodation centres, in accommodation and social reintegration centres, in state-provided hotels, or in a reception centre for asylum seekers). To participate in the survey, they must have at least one child under the age of thirteen, and speak one of the 17 languages of the study.</p> <p>Each eligible family, willing to participate in the study, was met twice, in their housing centre</p>
--------------------	--

## Population type

Age	<p>Childhood (6 to 13 years)</p> <p>Adolescence (13 to 18 years)</p> <p>Adulthood (19 to 24 years)</p> <p>Adulthood (25 to 44 years)</p> <p>Adulthood (45 to 64 years)</p> <p>Elderly (65 to 79 years)</p> <p>Great age (80 years and more)</p>

Pathology

Gender	Male Woman
Geography area	National
Detail of the geography area	France
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2013
Date of last collection (YYYY or MM/YYYY)	2013
Size of the database	
Size of the database (number of individuals)	[500-1000[ individuals
Details of the number of individuals	801 families
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data Biological data
Clinical data (detail)	Direct physical measures Medical registration
Details of collected clinical data	Anthropometric measurements and blood pressure, Health history
Declarative data (detail)	Face to face interview
Details of collected declarative data	Characteristics and living conditions of the family but also on health and use of health care of the adult surveyed. Health and social relations of children. Measurement of development (Vineland, The Dominic Interactive, The Strengths and Difficulties Questionnaire)
Biological data (detail)	Measuring the level of haemoglobin, Measuring the level of vitamins, Collecting a strand of hair
Presence of a biobank	No

Health parameters studied	Health event/morbidity Health care consumption and services Quality of life/health perception
Care consumption (detail)	Hospitalization Medical/paramedical consultation Medicines consumption
Procedures	
Participant monitoring	No
Followed pathology
