Organization	Samu-Social
Name of the director	Le mener

Surname	Erwan
Email	e.lemener@samusocial-75.fr
Organization	Samu-Social

## Collaborations

Participation in projects, networks and consortia	Yes
---	-----

## Funding

Funding status	Mixed
----------------	-------

Details	(ARS), Cancéropôle Ile-de-France, the Caisse nationale des allocations familiales (CNAF), the Fondation de France, Fondation Macif, Sanofi Espoir Foundation, State Street Foundation, French Institute for Health Promotion and Health Education (INPES), Institut de recherche en santé publique (IReSP), French Institute for Public Health Surveillance (InVS), the French Ministry of the Interior, Observatoire national de l'enfance en danger (ONED) and Procter & Gamble.
---------	--

## Governance of the database

Sponsor(s) or organisation(s) responsible	Samu Social
Organisation status	Public
Presence of scientific or steering committees	Yes

## Additional contact

## Main features

## Type of database

Type of database	Study databases
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	Yes

Details	Performed at individual level
---------	-------------------------------

Additional information regarding sample selection.

We conducted a three-tiered random survey:

- First tier: draw of the facilities listed according to their size, in each defined stratum (depending on the type of structure, its catchment area and the distance to the nearest train station, see below);
- Second tier: draw of families in the list of eligible households (developed on site);
- Third tier: draw of children under 13 years of age among children aged 0 to 12 years included in the family (having agreed to participate in the survey)

## Database objective

Main objective

The objectives of the ENFAMS survey:

- estimate the size of the population of families without housing in Île-de-France and describe their sociodemographic characteristics;
- characterise the living conditions, history and state of health of these families; 2
- describe the state of health of mothers and children on three main lines: use of health care, mental health, nutritional health, perinatal health;
- comparing the prevalence and results obtained with other studies carried out among homeless populations, precarious populations or the general population;
- describe the impact of homelessness on the daily and social lives of parents and children, focusing in particular on the matter of schooling.

Inclusion criteria

Families without housing (housed in emergency accommodation centres, in accommodation and social reintegration centres, in state-provided hotels, or in a reception centre for asylum seekers). To participate in the survey, they must have at least one child under the age of thirteen, and speak one of the 17 languages of the study. Each eligible family, willing to participate in the study, was met twice, in their housing centre

## Population type

Age

Childhood (6 to 13 years)  
Adolescence (13 to 18 years)  
Adulthood (19 to 24 years)  
Adulthood (25 to 44 years)  
Adulthood (45 to 64 years)  
Elderly (65 to 79 years)  
Great age (80 years and more)

Population covered

General population

Pathology

Gender	Male Woman
Geography area	National
Detail of the geography area	France
<b>Data collection</b>	
<b>Dates</b>	
Date of first collection (YYYY or MM/YYYY)	2013
Date of last collection (YYYY or MM/YYYY)	2013
<b>Size of the database</b>	
Size of the database (number of individuals)	[500-1000[ individuals
Details of the number of individuals	801 families
<b>Data</b>	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data Biological data
Clinical data (detail)	Direct physical measures Medical registration
Details of collected clinical data	Anthropometric measurements and blood pressure, Health history
Declarative data (detail)	Face to face interview
Details of collected declarative data	Characteristics and living conditions of the family but also on health and use of health care of the adult surveyed. Health and social relations of children. Measurement of development (Vineland, The Dominic Interactive, The Strengths and Difficulties Questionnaire)
Biological data (detail)	Measuring the level of haemoglobin, Measuring the level of vitamins, Collecting a strand of hair
Presence of a biobank	No

Health parameters studied	Health event/morbidity Health care consumption and services Quality of life/health perception
---------------------------	---

Care consumption (detail)	Hospitalization Medical/paramedical consultation Medicines consumption
---------------------------	--

## Procedures

Participant monitoring	No
