

# PREVIPAP - Cross-sectional study of sexually active young French women eligible for HPV vaccination

Head :Mougin Christiane, Laboratory of Cellular and Molecular Biology, EA 3181, FED4234  
Mercier Mariette, EA 3181, FED4234  
Baudu Ariane, EA 3181, FED4234

Last update : 01/01/2020 | Version : 1 | ID : 73193

## General

### Identification

Detailed name Cross-sectional study of sexually active young French women eligible for HPV vaccination

Sign or acronym PREVIPAP

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation CCTIRS no.: 10.079Ter

### General Aspects

Medical area Cancer research  
Infectious diseases

Pathology (details) Cervical cancer

Health determinants Healthcare system and access to health care services

Keywords young women, cancer, HPV, screening, vaccine

## Additional contact

## Main features

## Type of database

Type of database Study databases

Study databases (details) Not-repeated cross-sectional studies (except case control studies)

Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
<b>Database objective</b>	
Main objective	The objective of this study was to assess the prevalence and risk factors for HPV infection in a cohort of sexually active young French women eligible for HPV vaccination
Inclusion criteria	Sexually active women aged 15-23 years living in the geographical region of Franche-Comté in France, who attended a consultation in the gynaecology department of the Hôpital Universitaire de Besançon in France, between 1 January 1997 and 31 December 2007
<b>Population type</b>	
Age	Adolescence (13 to 18 years) Adulthood (19 to 24 years)
Population covered	General population
<b>Pathology</b>	
Gender	Woman
Geography area	Local
French regions covered by the database	Bourgogne Franche-Comté
Detail of the geography area	Besancon
<b>Data collection</b>	
<b>Dates</b>	
Date of first collection (YYYY or MM/YYYY)	1997
Date of last collection (YYYY or MM/YYYY)	2010
<b>Size of the database</b>	
Size of the database (number of	[1000-10 000[ individuals

individuals)

Details of the number of individuals 2163

## Data

Database activity Data collection completed

Type of data collected Declarative data  
Biological data

Declarative data (detail) Paper self-questionnaire

Details of collected declarative data Sociodemographic data, gynaecological history (age at first HPV test, age of first menstruation, age at first pregnancy, number of children, sexually transmitted diseases), sexual behaviour (age at first sexual intercourse, time between age at first sexual intercourse and age at HPV test, use of contraceptives)

Biological data (detail) Pelvic examination and two smear tests (Cytobrush® Plus and DNAPAP Cervical Sampler?). HPV DNA detection

Presence of a biobank Yes

Contents of biobank Others

Details of biobank content Samples of cervical cells

Health parameters studied Health event/morbidity  
Health care consumption and services

Care consumption (detail) Medicines consumption

## Procedures

Participant monitoring No

Followed pathology

Links to administrative sources No

## Promotion and access

### Promotion
