

# FRAMIG 3 - Cross-sectional study on the recognition and therapeutic management of migraine

Head :Radat Francoise  
Lucas Christian

Last update : 10/20/2017 | Version : 1 | ID : 73244

## General

### Identification

Detailed name Cross-sectional study on the recognition and therapeutic management of migraine

Sign or acronym FRAMIG 3

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation

CNIL

### General Aspects

Medical area Neurology

Pathology (details) Migraine

Health determinants Healthcare system and access to health care services  
Lifestyle and behavior

Keywords therapeutic response, medical consultation, psychiatric comorbidities, migraine, quality of life

### Scientific investigator(s) (Contact)

Name of the director Radat

Surname Francoise

Organization CHU Pellegrin

Name of the director Lucas

Surname Christian

Organization	CHRU Lille
Collaborations	
Funding	
Funding status	Private
Details	AstraZeneca France
<b>Governance of the database</b>	
Sponsor(s) or organisation(s) responsible	TNS SOFres
Organisation status	Private
Sponsor(s) or organisation(s) responsible	Société Française d'Etudes des Migraines et Céphalées
Organisation status	Public
<b>Additional contact</b>	
<b>Main features</b>	
<b>Type of database</b>	
Type of database	Study databases
Study databases (details)	Repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A population file
Database recruitment is made on the basis of:	Another treatment or procedure
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Send-out of a self-administered questionnaire to a sample of 15,000 households selected from the ACCESS-SANTE database to be representative of the French population
<b>Database objective</b>	
Main objective	Assess the proportion of migraine sufferers who are aware of their illness

Determine the factors (disability, quality of life, psychiatric comorbidities, medical consultations) that may lead to becoming aware of migraine  
Assess the influence of these factors on migraine attacks.

Inclusion criteria	Randomly selected subjects from the ACCESS-SANTE database
<b>Population type</b>	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	General population
<b>Pathology</b>	
Gender	Male Woman
Geography area	National
Detail of the geography area	France
<b>Data collection</b>	
<b>Dates</b>	
Date of first collection (YYYY or MM/YYYY)	2003
Date of last collection (YYYY or MM/YYYY)	2003
<b>Size of the database</b>	
Size of the database (number of individuals)	[10 000-20 000[ individuals
Details of the number of individuals	10 532
<b>Data</b>	
Database activity	Data collection completed
Type of data collected	Declarative data

Declarative data (detail)	Paper self-questionnaire
Details of collected declarative data	identification of migraine sufferers and classification of diagnostic criteria. Determination of cases of severe or probable migraine. Quality of life, depression, anxiety. Impact of migraine (MIDAS, SF-12, HRQoL, HADS). Treatments and medication
Presence of a biobank	No
Health parameters studied	Quality of life/health perception
<b>Procedures</b>	
Participant monitoring	No
Followed pathology	
Links to administrative sources	No
<b>Promotion and access</b>	
<b>Promotion</b>	
Link to the document	<a href="http://www.ncbi.nlm.nih.gov/pubmed/16643573">http://www.ncbi.nlm.nih.gov/pubmed/16643573</a>
<b>Access</b>	
Terms of data access (charter for data provision, format of data, availability delay)	Contact the scientist in charge
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
