

# - Cross-sectional study in the general population: mental health in 4 French regions (Ile-de-France, Lorraine, Rhône-Alpes, Normandy)

Head :Kovess-Masféty Viviane, METIS Department, Epidemiology and biostatistics for decision-making in public health / Health Process and Psychopathology Laboratory (EA 4057)  
Fermanian Christophe, Métis

Last update : 10/20/2017 | Version : 1 | ID : 73325

General	
Identification	
Detailed name	Cross-sectional study in the general population: mental health in 4 French regions (Ile-de-France, Lorraine, Rhône-Alpes, Normandy)
General Aspects	
Medical area	Psychology and psychiatry
Health determinants	Addictions Healthcare system and access to health care services Lifestyle and behavior Social and psychosocial factors
Keywords	planning, management, epidemiology, mental health
Scientific investigator(s) (Contact)	
Name of the director	Kovess-Masféty
Surname	Viviane
Address	20 avenue George Sand La Plaine St Denis 93210
Phone	+33 (0) 607426788
Email	vkovess@gmail.com viviane.kovess@ehesp.fr viviane.kovess-masfety@parisdescartes.fr
Unit	METIS Department, Epidemiology and biostatistics for decision-making in public health / Health Process and Psychopathology Laboratory (EA 4057)
Organization	EHESP, Université Paris Descartes

Name of the director	Fermanian
Surname	Christophe
Phone	+ 33 (0)2 99 02 24 33
Email	christophe.fermanian@ehesp.fr
Unit	Métis
Organization	EHESP

## Collaborations

## Funding

Funding status	Public
----------------	--------

Details	Ministry of Social Affairs, Health and the regions
---------	--

## Governance of the database

Sponsor(s) or organisation(s) responsible	EHESP
Organisation status	Public

## Additional contact

## Main features

## Type of database

Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)

Database recruitment is carried out by an intermediary	A population file
--	-------------------

Database recruitment is carried out as part of an interventional study	No
--	----

Additional information regarding sample selection.	5,000 "successful" people, by voluntary region, i.e. a total of 20,000, were needed for the survey, thus allowing for a representative level of health regions, plus a national sample of 2,000 people with only mobile phones.
--	---

## Database objective

Main objective	Provide indicators of mental health needs based on social indicators to enable better planning based on the needs of a "population pool"
Inclusion criteria	Subjects drawn randomly
<b>Population type</b>	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	General population
Pathology	
Gender	Male Woman
Geography area	Regional
French regions covered by the database	Alsace Champagne-Ardenne Lorraine Auvergne Rhône-Alpes Île-de-France Normandie
Detail of the geography area	Ile-de-France,Lorraine, Rhône-Alpe, Normandie
<b>Data collection</b>	
<b>Dates</b>	
Date of first collection (YYYY or MM/YYYY)	2005
Date of last collection (YYYY or MM/YYYY)	2005
<b>Size of the database</b>	
Size of the database (number of individuals)	Greater than 20 000 individuals
Details of the number of individuals	22138
<b>Data</b>	
Database activity	Data collection completed

Type of data collected	Clinical data Declarative data
Details of collected clinical data	Psychological distress, the gene for an emotional problem, psychiatric diagnoses: CIDI-SF, Substance use disorders (alcohol or drugs), Mental health scales (Psychological distress, Positive mental health), Other scales (Social network, Measurement of severe difficulties, Physical diseases), The transformation of scales into indicators of need for mental health and psychiatric care, Measurement of the use of the health-care system
Declarative data (detail)	Phone interview
Details of collected declarative data	Composition of the household (age and sex), Sociodemographic variables ( Age, Sex, Marital status, Level of education, Employment situation, The family income bracket, Housing situation, Social minima
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health care consumption and services Quality of life/health perception
Care consumption (detail)	Medical/paramedical consultation
<b>Procedures</b>	
Data collection method	Collection by investigators trained by the IPSOS Survey Institute
Participant monitoring	No
Followed pathology	
Links to administrative sources	No
<b>Promotion and access</b>	
<b>Promotion</b>

## Access

Terms of data access (charter for data provision, format of data, availability delay)

The data is available from the statistician of the METIS department of the EHESP. It is in stata in .dta format as well as the documentation: questionnaires and description of the variables. Several people are working on this database, consultation is necessary before use and a scientifically sound project.

Access to aggregated data

Access not yet planned

Access to individual data

Access on specific project only
