

QALIFF - Prospective observational study on the quality of life of patients with Clostridium difficile infection

Head :Levy Bachelot Laurie

Last update : 10/19/2017 | Version : 1 | ID : 73339

General

Identification

Detailed name Prospective observational study on the quality of life of patients with Clostridium difficile infection

Sign or acronym QALIFF

General Aspects

Medical area Infectious diseases

Pathology (details) Clostridium difficile infection

Health determinants Others (specify)

Others (details) quality of life, sociodemographic and clinical characteristics of patients, therapeutic management

Keywords Clostridium difficile infection, quality of life

Scientific investigator(s) (Contact)

Name of the director Levy Bachelot

Surname Laurie

Address 34 avenue Léonard de Vinci
92418 Courbevoie cedex

Organization MSD

Collaborations

Participation in projects, networks and consortia No

Funding

Funding status Private

Details MSD France

Governance of the database

Sponsor(s) or organisation(s) responsible MSD France

Organisation status Private

Presence of scientific or steering committees Yes

Additional contact

Main features

Type of database

Type of database Study databases

Study databases (details) Cohort study

Database recruitment is carried out by an intermediary A selection of health institutions and services

Database recruitment is carried out as part of an interventional study No

Database objective

Main objective Evaluate the consequences of a Clostridium difficile infection (CDI) on the quality of life of the patients through the progression of the EQ-5D profile before/during the episode

Inclusion criteria

Inclusion criteria

- Adult patient with CDI, regardless of the reason for hospitalisation,
- Patient having given informed consent.

Exclusion criteria

- Patient under 18 years of age.
- Patient without telephone.
- Patient unable to answer questionnaire (language barrier, cognitive deficits).
- Patient refusing to participate.
- Patient with chronic Inflammatory Bowel Disease (IBD).
- Patient included in a therapeutic trial at the time of the study

Population type

Age Adulthood (19 to 24 years)

Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population covered Sick population

Pathology XI - Diseases of the digestive system

Gender Male
Woman

Geography area National

Detail of the geography area place of hospitalisation

Data collection

Dates

Size of the database

Size of the database (number of individuals) < 500 individuals

Details of the number of individuals 250 theoretical patients

Data

Database activity Current data collection

Type of data collected Clinical data
Declarative data
Administrative data
Utility / preference data

Clinical data (detail) Direct physical measures
Medical registration

Declarative data (detail) Face to face interview
Phone interview

Presence of a biobank No

Procedures

Participant monitoring Yes

Monitoring procedures Monitoring by contact with the participant (mail, e-mail, telephone etc.)

Links to administrative sources No

Promotion and access

Promotion

Access

Terms of data access (charter for data provision, format of data, availability delay)	No data access charter
