QALIFF - Prospective observational study on the quality of life of patients with Clostridium difficile infection

Head :Levy Bachelot Laurie

Last update: 10/19/2017 | Version: 1 | ID: 73339

Last update: 10/19/2017 Version: 1 IL	D: /3339
General	
Identification	
Detailed name	Prospective observational study on the quality of life of patients with Clostridium difficile infection
Sign or acronym	QALIFF
General Aspects	
Medical area	Infectious diseases
Pathology (details)	Clostridium difficile infection
Health determinants	Others (specify)
Others (details)	quality of life, sociodemographic and clinical characteristics of patients, therapeutic management
Keywords	Clostridium difficile infection, quality of life
Scientific investigator(s) (Contact)	
Name of the director	Levy Bachelot
Surname	Laurie
Address	34 avenue Léonard de Vinci 92418 Courbevoie cedex
Organization	MSD
Collaborations	
Participation in projects, networks and consortia	No
Funding	
Funding status	Private
Funding status	1117000

Governance of the database	
Sponsor(s) or organisation(s) responsible	MSD France
Organisation status	Private
Presence of scientific or steering committees	Yes
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Database objective	
Main objective	Evaluate the consequences of a Clostridium difficile infection (CDI) on the quality of life of the patients through the progression of the EQ-5D profile before/during the episode
Inclusion criteria	Inclusion criteria - Adult patient with CDI, regardless of the reason for hospitalisation, - Patient having given informed consent. Exclusion criteria - Patient under 18 years of age Patient without telephone Patient unable to answer questionnaire (language barrier, cognitive deficits) Patient refusing to participate Patient with chronic Inflammatory Bowel Disease (IBD) Patient included in a therapeutic trial at the time of the study
Population type	
Age	Adulthood (19 to 24 years)

	Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	Sick population
Pathology	XI - Diseases of the digestive system
Gender	Male Woman
Geography area	National
Detail of the geography area	place of hospitalisation
Data collection	
Dates	
Size of the database	
Size of the database (number of individuals)	< 500 individuals
Details of the number of individuals	250 theoretical patients
Data	
Database activity	Current data collection
Type of data collected	Clinical data Declarative data Administrative data Utility / preference data
Clinical data (detail)	Direct physical measures Medical registration
Declarative data (detail)	Face to face interview Phone interview
Presence of a biobank	No
Procedures	
Participant monitoring	Yes
Monitoring procedures	Monitoring by contact with the participant (mail, e-mail, telephone etc.)

Promotion and access	
Promotion	
Access	
Terms of data access (charter for data provision, format of data, availability delay)	No data access charter
