

# HOME-CoV - Hospitalization or Outpatient Management of patients with a proven or probable SARS-CoV-2 infection

Head :DOUILLET Delphine

Last update : 02/05/2021 | Version : 1 | ID : 73649

## General

### Identification

Detailed name Hospitalization or Outpatient Management of patients with a proven or probable SARS-CoV-2 infection

Sign or acronym HOME-CoV

### General Aspects

Medical area Emergency medicine

Study in connection with Covid-19 Yes

Health determinants Healthcare system and access to health care services

### Scientific investigator(s) (Contact)

Name of the director DOUILLET

Surname Delphine

Email Delphine.Douillet@chu-angers.fr

### Collaborations

### Funding

Funding status Public

Details CHU Angers

### Governance of the database

Sponsor(s) or organisation(s) responsible CHU Angers

Organisation status

<b>Main features</b>	
<b>Type of database</b>	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is made on the basis of:	Another treatment or procedure
Database recruitment is carried out as part of an interventional study	Yes
Details	Performed at group level (clusters)
<b>Database objective</b>	
Main objective	the composite rate of adverse outcomes [ Time Frame: day 7 ] Adverse outcomes include intubation with mechanical ventilation requirement and death (Stage ? 6 on "Ordinal Scale for Clinical Improvement" of the World Health Organization) within 7 days after inclusion.
Inclusion criteria	The rate of hospitalization [ Time Frame: 24 hours ] The rate of patients hospitalized after admission to the emergency room including patients discharged home more than 24 hours after admission.  It will be analyzed in a hierarchical approach, only if first primary objective is positive i.e. non-inferiority of HOME-CoV strategy versus current practice on the rate of adverse outcomes.
<b>Population type</b>	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	Sick population

Pathology	J12 - Viral pneumonia, not elsewhere classified
Gender	Male Woman
Geography area	International
Detail of the geography area	France Belgium
<b>Data collection</b>	
<b>Dates</b>	
<b>Size of the database</b>	
Size of the database (number of individuals)	[1000-10 000[ individuals
Details of the number of individuals	4000
<b>Data</b>	
Database activity	Current data collection
Type of data collected	Clinical data Declarative data Paraclinical data Biological data Administrative data
Clinical data (detail)	Direct physical measures Medical registration
Declarative data (detail)	Face to face interview Phone interview
<b>Procedures</b>	
Participant monitoring	Yes
Monitoring procedures	Monitoring by contact with the participant (mail, e-mail, telephone etc.)
<b>Promotion and access</b>	
<b>Promotion</b>	
<b>Access</b>
