

PreCARES - "Poverty and Covid-19: changes in access and recourse to health care", Île-de-France March-June 2020

Responsable(s) :Véran Jean François

Date de modification : 05/05/2021 | Version : 1 | ID : 73904

Général	
Identification	
Nom détaillé	"Poverty and Covid-19: changes in access and recourse to health care", Île-de-France March-June 2020
Sigle ou acronyme	PreCARES
Numéro d'enregistrement (ID-RCB ou EUDRACT, CNIL, CPP, etc.)	Université de Paris Descartes (CER N° 2020-57)
Thématiques générales	
Domaine médical	Emergency medicine
Etude en lien avec la Covid-19	Yes
Déterminants de santé	Geography Healthcare system and access to health care services Lifestyle and behavior Nutrition Social and psychosocial factors Others (specify)
Autres, précisions	Poverty, migration
Mots-clés	Access and recourse to health care, emergency housing, Poverty
Responsable(s) scientifique(s)	
Nom du responsable	Véran
Prénom	Jean François
Organisme	Federal University of Rio, Brazil
Collaborations	
Participation à des projets, des réseaux, des consortiums	Yes

Précisions	Médecins sans frontières emergency medical project - Covid and precariousness in Ile de France
Financements	
Financements	Private
Gouvernance de la base de données	
Organisation(s) responsable(s) ou promoteur	Doctors without Borders (MSF)
Statut de l'organisation	Secteur Privé
Existence de comités scientifique ou de pilotage	Yes
Contact(s) supplémentaire(s)	
Nom du contact	Viot
Prénom	Marianne
Email	marianne.viot@paris.msf.org
Laboratoire	CNRS - LADYSS
Organisme	Paris Nanterre University
Caractéristiques	
Type de base de données	
Type de base de données	Study databases
Base de données issues d'enquêtes, précisions	Not-repeated cross-sectional studies (except case control studies)
Origine du recrutement des participants	A selection of health institutions and services
Le recrutement dans la base de données s'effectue dans le cadre d'une étude interventionnelle	Yes
Précisions	Performed at group level (clusters)
Objectif de la base de données	
Objectif principal	The study set itself the objective of investigating

and documenting the way in which vulnerable populations coped with the lockdown period for controlling the Covid-19 crisis, in terms of the following three aspects: 1) The effects of reducing the public space, access to resources and available services and health care, limiting the ability of vulnerable populations to look after themselves, particularly in terms of health. 2) The way in which public policies for the Covid-19 epidemic were applied - or not - in practical situations facing vulnerable populations. 3) The ability of the stakeholders - including MSF - to offer a solution to health problems arising among these populations, both in terms of the epidemic, and more general health needs.

Critères d'inclusion	The study population concerned vulnerable individuals aged over 15 years, randomly and proportionally selected at each study site. The study sites were selected out of convenience, to fulfil the following criteria: sites still open and at which the MSF Covid Poverty project intervened at least once to provide medical and paramedical care, in the Paris and Seine Saint Denis administrative departments (main geographical zone of the MSF project), accepting populations suffering from economic and/or administrative instability, representing diverse forms of housing and accommodations, where the safety conditions at the time of the survey permitted, and after approval by the head of the association or housing facility.
Type de population	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years)
Population concernée	General population
Pathologie	
Sexe	Male Woman
Champ géographique	Regional
Régions concernées par la base de données	Île-de-France
Détail du champ géographique	Ile de France

Collecte	
Dates	
Année du premier recueil	June 12, 2020
Année du dernier recueil	June 20, 2020
Taille de la base de données	
Taille de la base de données (en nombre d'individus)	< 500 individuals
Détail du nombre d'individus	433
Données	
Activité de la base	Data collection completed
Type de données recueillies	Declarative data
Données déclaratives, précisions	Face to face interview
Existence d'une bibliothèque	No
Modalités	
Mode de recueil des données	Modular structured questionnaires administered in a face-to-face setting, anonymously and for approximately 45 minutes, in the participant's language (via the investigator-translator or by telephone translation), and recorded on an electronic tablet.
Suivi des participants	No
Pathologie suivies	
Appariement avec des sources administratives	No
Valorisation et accès	
Valorisation et accès

Description	The “Poverty and Covid-19: changes in access and recourse to health care” (PréCARES) study is a cross-sectional study on preventive practices,

healthcare research, obstacles to access related to the lockdown (March – May 2020) and the healthcare path during the Covid-19 epidemic in Ile-de-France, alongside populations destined for the MSF France “Covid-19 and vulnerable populations” emergency programme.
