

- Health barometer

Responsable(s) :BECK François

Date de modification : 01/01/2020 | Version : 1 | ID : 1025

Général	
Identification	
Nom détaillé	Health barometer
Thématiques générales	
Domaine médical	Infectious diseases Psychology and psychiatry
Déterminants de santé	Addictions Occupation Social and psychosocial factors
Autres, précisions	Chronic diseases
Mots-clés	Vaccination, sexuality, life quality, aging, pathological gambling, psychotropic medication, pain, internet and health, health care, screening, alcohol, tobacco, cannabis, drugs, mental health, suicide, sleep, contraception, accidents, Alzheimer, violence
Responsable(s) scientifique(s)	
Nom du responsable	BECK
Prénom	François
Adresse	42, boulevard de la Libération
Téléphone	+33 (0)1 49 33 22 22
Email	pierre.arwidson@inpes.sante.fr
Organisme	INPES - Institut National de la Prévention et d'Éducation pour la
Collaborations	
Financements	
Financements	Public
Précisions	Ministère chargé de la santé CNAMTS

Gouvernance de la base de données

Organisation(s) responsable(s) ou promoteur INPES

Statut de l'organisation Secteur Public

Contact(s) supplémentaire(s)

Caractéristiques

Type de base de données

Type de base de données Study databases

Base de données issues d'enquêtes, précisions Repeated cross-sectional studies (except case control studies)

Origine du recrutement des participants An administrative base or a register

Le recrutement dans la base de données s'effectue dans le cadre d'une étude interventionnelle No

Informations complémentaires concernant la constitution de l'échantillon

Two-level survey (household, then individual)
Random selection from the France Telecom directory.
Sending a letter before the call (if the address is available, otherwise is sent later)
Selection of the individuals according to anniversary method until 2005, and according to Kish method until 2010.
People registered in red lists and people reachable only by mobile phone participate to the survey.

Call distribution in 2010:
Fixed telephone line: 80 to 85%
Only mobile phone: 13 to 15%
Full unbundled access: 3 to 5%

Objectif de la base de données

Objectif principal

Follow the evolution of some basic indicators about behavior and attitudes towards health on general population. Follow the evolution by age group, gender, sub-populations? according to the large size of the sample. Feed the different INPES information programs concerning behaviors, opinion and attitudes towards health as well as determinants (associates factors) of these

opinions.

Study, thanks to the large size of the sample, sub-populations specificities (young people, old people, students, unemployed people) and unusual behaviors.

Study the links between representations and behaviors concerning health

(the difference between barometers and other health surveys is that they are surveys about prevention practices and lifestyles concerning health factors. There is no attempt to measure exactly health conditions. A relevant part of the questionnaire concerns sensitive topics such as addictions, mental health, sexual behaviors, etc.)

Being complementary to other big health surveys (avoid repetition, research coherence), in a collaborative effort.

Participate, thanks to the large size of the base, to the production of regional data, in collaboration with the ORS.

In the dimension study/observation, it will also be a point of support for the evaluation of public politics: indicators of the follow of Public Health laws, assessment of government plans (addictions plan, mental health plan, ageing well?)

Critères d'inclusion

Question people belonging to households:

- Equipped with a fixed telephone line (white, orange or red list)
- Equipped with just a mobile phone
- Full unbundled access

Type de population

Age

Adolescence (13 to 18 years)
Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population concernée

General population

Sexe

Male
Woman

Champ géographique

National

Détail du champ géographique

Metropolitan France

Collecte

Dates

Année du premier recueil 1992

Année du dernier recueil 2010

Taille de la base de données

Taille de la base de données (en nombre d'individus) Greater than 20 000 individuals

Détail du nombre d'individus Sample size 1992 2099 1993 1950 1995 1993 1997
4115 young people 2000 13 685 (+ 5 regional samples) 2005 30 514 (+7 regional samples) 2010
27 653 (+ 10 regional samples) Age: 18 to 75 years for 1992 1993 1995 barometers 12 to 19 years for
1997 barometers 12 to 75 years for 2000 et 2005 barometers 15 to 85 years for 2010 barometers

Données

Activité de la base Data collection completed

Type de données recueillies Declarative data

Données déclaratives, précisions Paper self-questionnaire
Phone interview

Existence d'une bibliothèque No

Paramètres de santé étudiés Health event/morbidity
Health care consumption and services
Quality of life/health perception
Others

Consommation de soins, précisions Hospitalization
Medical/paramedical consultation
Medicines consumption

Autres, précisions Prevention (behaviors, screening), health and social inequalities

Modalités

Mode de recueil des données Data collection by phone with a web survey complement in 2010

Nomenclatures employées Duke inventory (health quality) CIDI -SF (depression) Cannabis Abuse Screening test (CAST): problem cannabis use AUDIT (problem alcohol use) fagerström (tobacco addiction) Healthy days (health quality) MH5 (SF36- mental health):

(mental health dimensions of a life quality scale)

Suivi des participants No

Appariement avec des sources administratives No

Valorisation et accès

Valorisation et accès

Accès

Charte d'accès aux données (convention de mise à disposition, format de données et délais de mise à disposition)

INPES publish presentations of the results of the surveys, as well as a 4-pages synopsis.
Publication of abstracts and articles in scientific magazines.
Full online publication.
Data diffusion depending on the convention once the work published

Accès aux données agrégées Access on specific project only

Accès aux données individuelles Access on specific project only
