

BINOME - Observational study of the sociodemographic characteristics of patients infected with HIV B subtype versus HIV non-B subtype and having recently started their first course of antiretroviral treatment.

Responsable(s) :Cohen-Codar Isabelle

Date de modification : 01/07/2018 | Version : 3 | ID : 1252

Général

Identification

Nom détaillé Observational study of the sociodemographic characteristics of patients infected with HIV B subtype versus HIV non-B subtype and having recently started their first course of antiretroviral treatment.

Sigle ou acronyme BINOME

Numéro d'enregistrement (ID-RCB ou EUDRACT, CNIL, CPP, etc.) CNIL n°906292

Thématiques générales

Domaine médical Infectious diseases

Déterminants de santé Occupation
Social and psychosocial factors

Mots-clés anti-retroviral drug treatment (ARV), viral subtype, Protease inhibitors (PI), non-nucleoside reverse transcriptase inhibitors (NNRTI), HIV

Responsable(s) scientifique(s)

Nom du responsable Cohen-Codar

Financements	Private
Précisions	ABBOTT France
Gouvernance de la base de données	
Organisation(s) responsable(s) ou promoteur	ABBOTT France
Statut de l'organisation	Secteur Privé
Contact(s) supplémentaire(s)	
Caractéristiques	
Type de base de données	
Type de base de données	Study databases
Base de données issues d'enquêtes, précisions	Not-repeated cross-sectional studies (except case control studies)
Origine du recrutement des participants	A selection of health institutions and services
Critère de sélection des participants	Medication(s) taken
Le recrutement dans la base de données s'effectue dans le cadre d'une étude interventionnelle	No
Informations complémentaires concernant la constitution de l'échantillon	Random selection of doctors from the database of doctors working on HIV and listed in the file of the French Medical Board. Each physician accepting to participate in the study will include the first 4 consecutive patients examined in consultation and meeting the eligibility criteria of which 2 patients in group 1 and 2 patients in group 2.
Objectif de la base de données	
Objectif principal	Describe and compare the socio-demographic characteristics of patients infected with an HIV-1 of subtype B (group 1) compared to non-B (group 2) treated with a first anti-retroviral drug treatment. Compare according to the HIV subtype the stage of the disease (clinical, viro-immunology, co-morbidities) at the time treatment is initiated, compare between the 2 groups (B and non-B) the conditions for taking the treatment and the

perception by the patient of the therapy and of its effects.
Identification of any correlation between these latter parameters and the change in the disease between the initiation and the first line ARV and the inclusion in the cohort:
- change in the viral load (VL) according to the ARV treatment (PI, NNRTI) and of the HIV subtype (B or non-B), of the CD4,
- any occurrence of clinical events,
- any changes in treatments and reasons.

Critères d'inclusion

Age > 18 years, obtaining of written consent for the collection of this personal data, patient infected by the HIV-1 virus, patient coming to consult for the first or second routine follow-up visit (i.e. 1 to 4 months) after the initiation of the ARV treatment, genotype available when the treatment is initiated.

Type de population

Age
Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)

Population concernée Sick population

Sexe
Male
Woman

Taille de la base de données (en nombre d'individus) < 500 individuals

Détail du nombre d'individus 304

Données

Activité de la base Data collection completed

Type de données recueillies	Clinical data Declarative data Biological data
Données cliniques, précisions	Direct physical measures Medical registration
Données déclaratives, précisions	Paper self-questionnaire Face to face interview
Données biologiques, précisions	biological monitoring of the HIV infection
Existence d'une bibliothèque	No
Paramètres de santé étudiés	Health event/morbidity Health care consumption and services Quality of life/health perception
Consommation de soins, précisions	Medicines consumption
Modalités	
Mode de recueil des données	"Patient" observation sheets completed by the physician and sent by the post to the company in charge of data management. Visual analog scales completed by the patient and remitted to the physician and then sent to the company in charge of data management.
Suivi des participants	No
Appariement avec des sources administratives	No
