Caractéristiques	
Type de base de données	
Type de base de données	Study databases
Base de données issues d'enquêtes, précisions	Repeated cross-sectional studies (except case control studies)
Origine du recrutement des participants	An administrative base or a register
Base ou registre, précisions	Recipients of the minimum integration income (RMI) at a mainland France CAF on 31 December 1996
Le recrutement dans la base de données s'effectue dans le cadre d'une étude interventionnelle	No
Informations complémentaires concernant la constitution de l'échantillon	Sample of 10,000 individuals, representing 882,047 recipients of the minimum integration income (RMI) enrolled in mainland France CAFs on 31 December 1996. The first questioning, streamlined, allowed for the identification of 1,850 individuals who had stopped receiving the minimum integration income (RMI) between December 1996 and September 1997. This first set was completed by a sample of 2,350 recipients, selected from those still receiving government benefits in September. The 4,200 individuals were questioned for a first time in January 1998 and a second time in September

1998.

Objectif de la base de données

Objectif principal

The purpose of this methodological study is to specify the family configuration actually experienced by recipients of the minimum integration income (RMI).

Critères d'inclusion

All of the individuals receiving the minimum integration income (RMI) from the metropolitan France on 31 December 1996, except for old farmers enrolled in the Mutualité sociale agricole

Type de population

Age

Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population concernée

General population

Pathologie

Sexe

Male
Woman
