Caractéristiques

Type de base de données

Type de base de données	Study databases
Base de données issues d'enquêtes, précisions	Repeated cross-sectional studies (except case control studies)
Origine du recrutement des participants	An administrative base or a register
Base ou registre, précisions	ANAEM management databases
Critère de sélection des participants	Another treatment or procedure
Le recrutement dans la base de données s'effectue dans le cadre d'une étude interventionnelle	No

Objectif de la base de données

Objectif principal	<p>This survey is intended to better understand the route, different trajectories (residential, professional, family) and use of social services of individuals who come to obtain a residence permit of at least one year in France and having a vocation to settle in France with stability. It also explores the vision and expectations that these migrants have for France and how these elements influence their trajectories in France. It specifically deals with understanding the migratory plan, its evolution over time, its individual or familial character, how it is modelled by institutions and the administrative categories with which the migrant is confronted. This allows for questions about the articulation between the migratory plan and the integration process. The two-part interview allows for introducing temporality into the understanding of this process, and to observe any connections between the evolution of the migratory plan and the</p>

living conditions encountered over the course of the first year with a residential permit.

Critères d'inclusion Foreign individuals of legal age (18 years or older) accepted by the Agence nationale de l'accueil des étrangers et des migrations (ANAEM) between June and October 2006 who were asked to sign a reception and integration contract (CAI). This survey deals with individuals eligible for a CAI, i.e.

- spouses of French citizens
- other relatives of French citizens
- beneficiaries of the family group
- refugees or members of their family
- individuals authorised due to personal and family connections in France (VPF 12 bis 7).

Type de population

Age Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population concernée General population

Pathologie

Sexe Male
Woman

Champ géographique National

Charte d'accès aux données
(convention de mise à
disposition, format de données
et délais de mise à disposition)

Available formats: The data are available in SAS, SPSS and STATA formats.

Confidentiality statement: To obtain the data, you must agree not to transfer the data, in any way, to a third party.

Special permissions: The "Production and Research" files (FPR) are subject to specific rules for use and should be destroyed at the end of the research for which they have been shared.

Restrictions for use: The data may only be used for research purposes. Any other use, commercial or otherwise, is strictly prohibited.

Reference requirement: The source of the data received must appear in the publications supported by these data (including footnotes, bibliographic references, table legends).

Submission requirement: In order to provide the producing organisations with essential information regarding the use of the archived resources, the data users are required to send the ADISP-CMH, if possible in electronic format, an abstract or a reprint of their publication(s), indicating which studies were used in an accompanying letter.

Conditions of access: Different access procedures according to the requesting party's institutional affiliation and status. In all cases, the approval of the request at the end of instruction leads to the signature of an individual agreement.

Liability disclaimer: The producer and sharer of the data are not responsible for interpretations or deductions made using the data.
