Organisme GEFOSAT

Collaborations	
Participation à des projets, des réseaux, des consortiums	Yes
Précisions	The Abbé Pierre foundation requested a research project on this topic from CREAI-ORS LR and GEFO SAT
Financements	
Financements	Public
Précisions	Languedoc-Roussillon regional health agency, Languedoc-Roussillon EDEME, Languedoc-Roussillon Region
Gouvernance de la base de données	
Organisation(s) responsable(s) ou promoteur	CREAI-ORS LR
Statut de l'organisation	Secteur Public
Organisation(s) responsable(s) ou promoteur	GEFO SAT
Statut de l'organisation	Secteur Privé
Contact(s) supplémentaire(s)	
Caractéristiques	
Type de base de données	
Type de base de données	Study databases
Base de données issues d'enquêtes, précisions	Not-repeated cross-sectional studies (except case control studies)
Origine du recrutement des participants	An administrative base or a register
Base ou registre, précisions	"Exposed" households were those receiving an expert assessment in 2011-2012 as part of the FATMEE programme (households surveyed by the departmental solidarity agencies and by CCAS)
Le recrutement dans la base de données s'effectue dans le cadre d'une étude	Yes

Précisions

Performed at group level (clusters)

Objectif de la base de données

Objectif principal

The purpose of the study is to describe the effects of energy insecurity on health and to identify how this particular form of precarity is an aggravating factor for the health condition of individuals facing it.

Critères d'inclusion

For the households surveyed by the departmental solidarity agencies:

- "exposed" households were those receiving an expert assessment in 2011-2012 as part of the FATMEE program. In each Departmental Solidarity Agency, a joint commission combining the project partners convenes every month in order to rule on the appeals to the FATMEE program; situations are presented by a referring social worker, who has conducted a first in-home visit following a request for assistance, as mentioned above (unpaid energy bills, outage, inability to heat, etc.);
- "unexposed" households were selected by a referring social worker at the level of each Departmental Solidarity Agency: for every "exposed" household included in the study, action was taken to find among the households requesting aid from departmental social services in the same territory (city or canton) another household without a proven energy insecurity problem that presented similar characteristics in terms of family structure (elderly person alone, family with two parents and two young children, single-parent family with young children, etc.). The fact of not experiencing energy insecurity was determined by a negative response to two questions: is it too cold in your household? have you had difficulties paying your energy bills over the last 12 months?

For households surveyed in the CCAS territory:

- "exposed" households were those that will receive an expert assessment under the FATMEE program. The determination of these households was made jointly by the CCAS and the GEFOSAT as part of a commission operating on the same principles as those of the departmental solidarity agencies;
- "unexposed" households were selected by a social worker based on the same principle as for the households monitored by social workers from the departmental solidarity agencies.

Type de population	
Age	Newborns (birth to 28 days) Infant (28 days to 2 years) Early childhood (2 to 5 years) Childhood (6 to 13 years) Adolescence (13 to 18 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population concernée	General population
Pathologie	
Sexe	Male Woman
Champ géographique	Departmental
Régions concernées par la base de données	Languedoc-Roussillon Midi-Pyrénées
Détail du champ géographique	Hérault
Collecte	
Dates	
Année du premier recueil	2012
Année du dernier recueil	2013
Taille de la base de données	
Taille de la base de données (en nombre d'individus)	< 500 individuals
Détail du nombre d'individus	356
Données	
Activité de la base	Data collection completed
Type de données recueillies	Declarative data
Données déclaratives, précisions	Paper self-questionnaire Face to face interview
Détail des données déclaratives	Housing questionnaire (the housing situation, the

recueillies	person responding, the residents of the household, the characteristics of the housing, the assessment of heating), Resident questionnaire (characteristics of the person, social coverage and forfeiture of care, perceived health condition, chronic disease, symptoms and health problems over the course of the last 12 months, health behaviours, assessment of housing)
Existence d'une bibliothèque	No

Paramètres de santé étudiés	Health event/morbidity Quality of life/health perception
-----------------------------	---

Modalités

Procédures qualité utilisées	The "resident" questionnaire was prepared by CREAM-ORS LR, specifically built upon the questionnaires used within the LARES (Large Analysis and Review of European housing and health Status) study conducted by the European office of the WHO
------------------------------	---

Suivi des participants	No
------------------------	----

Pathologie suivies	
--------------------	--

Appariement avec des sources administratives	No
